What Are The Driving Factors Impacting The Animal Growth Promoters And Performance Enhancers Market?

The increasing need for meat is one significant element contributing to the expansion of the animal growth promoters and performance enhancers market. The role of growth promoters is to encourage animals to gain weight and fat, thereby raising meat output and the cost of the livestock. Around the globe, many people primarily rely on meat as a protein source. As per a research done by FAO, there has been a two-fold increase in meat production over the last three decades. It is anticipated that this pattern of meat production and consumption will persist. It is estimated that by 2050, the worldwide consumption of meat will range from 460 to 570 million tons. This is predicted to mutually benefit and propel the market for animal growth promoters and performance enhancers.

Which Players Dominate The Animal Growth Promoters And Performance Enhancers Industry Landscape?
