

PALLADIO INDUSTRIES, INC ANNOUNCES COMPLETION OF MAJOR CAPACITY EXPANSION IN TEXAS

New production line brings Palladio's total installed capacity for

polyacrylamides to approximately 270,000 tons/y positioning among the largest Producers USA

TEMPLE, TX, UNITED STATES, October 16, 2025 /EINPresswire.com/ -- Palladio Industries, Inc.

“

Palladio Industries is a global leader in water-soluble polymers, providing advanced solutions for high-water-intensity applications. We stand out for our fully integrated production process.”

Lisa Toniolo

announces the successful completion of a major expansion project at its Temple, Texas facility, marking a significant milestone in the company's continued growth and investment in U.S. manufacturing.

The new production line brings Palladio's total installed capacity for [polyacrylamides](#) to approximately 270,000 metric tons per year, positioning the company among the largest and most advanced producers in North America.

This achievement builds on a series of strategic investments made over the past two years to strengthen

Palladio's supply chain resilience, production flexibility, and long-term reliability for customers across key industrial and energy sectors.

“Palladio remains deeply committed to supporting our partners with reliable, high-quality polymer solutions produced in the United States,” said Lisa Toniolo, CEO of Palladio Industries, Inc.

“This expansion represents not just additional capacity, but a renewed commitment to innovation, sustainability, and leadership in the water-soluble polymers market.”

Columbia Holding, Palladio's parent company, welcomed the milestone as a core step in its broader global strategy.

“Columbia's Board of Directors views this expansion as a testament to the group's long-term vision, combining technology, integration, and sustainability to set new standards for performance and partnership,” said Roberto Toniolo, President of Columbia Holding.

About Palladio Industries

Palladio Industries is a leading U.S. manufacturer of water-soluble polymers serving water-intensive and specialty applications. The company is fully back-integrated and among the world's largest producers of bio-acrylamide monomer, produced using Columbia Bio-Tech's proprietary non-GMO biocatalyst technology.
