

Innovative Radiology Is Excited to Announce Their ISO 13485:2016 Certification

Innovative Radiology is proud to achieve ISO 13485:2016 certification, reinforcing our commitment to quality, safety, & excellence in medical imaging solutions.

CONYERS, GA, UNITED STATES, October 20, 2025 /EINPresswire.com/ -- ISO 13485:2016 certification shows that Innovative Radiology's quality management system meets the globally recognized standard for the medical device industry. This certification signals to customers, manufacturers and regulatory bodies that we operate with the same rigor and compliance as medical device producers themselves. It's a powerful trust signal: clients know they can rely on our processes without having to invest time and resources into extra supplier audits. This not only strengthens our credibility but also makes us an easy, low-risk choice when seeking dependable partners.

Innovative Radiology Logo

Beyond reputation, ISO 13485:2016 opens doors to new business opportunities. Many manufacturers require certified partners to even bid on projects, especially in regulated markets like the EU, Canada, and Japan. Internally, it drives operational discipline—reducing errors, increasing efficiency, and cutting costs tied to rework or nonconformities. In short, ISO 13485:2016 isn't just a compliance badge—it's a competitive advantage that boosts trust, and operational excellence.

In summary, ISO 13485:2016 is a strategic advantage for both our company and our partners. If you have any questions about our certification, please let us know. Together, we can explore how our certification can benefit your business. We look forward to working with you.
