

CMG Unveils Open Side Containers Designed for Easy Loading and Event Storage Solutions

New Open Side Containers from CMG Containers simplify storage, transport, and event logistics with full-length accessibility and superior design versatility.

FORT LAUDERDALE, FL, UNITED STATES, October 21, 2025 /EINPresswire.com/ -- CMG Containers, a leading U.S.-based provider of modular and shipping container solutions, has announced the launch of its new Open Side Containers, developed to offer maximum accessibility and convenience for storage, transportation, and event-based applications.

With side-opening doors that extend the full length of the unit, these containers allow effortless loading and unloading, making them ideal for logistics operations, construction sites, and event setups where fast access and visibility are key. The addition of this product line further expands CMG's comprehensive container portfolio, which includes 8ft, 10ft, 20ft, 40ft, and specialty models.

Simplifying Access and Storage for Modern Businesses

Traditional front-door containers can limit workflow efficiency, particularly for businesses

managing large or irregularly shaped items. CMG's Open Side Containers eliminate this challenge by allowing users to open one entire side of the unit, creating a wide, unobstructed entry point.

This design innovation makes loading faster, inventory organization simpler, and space utilization more flexible, especially for events, exhibitions, or mobile retail spaces that demand frequent setup and breakdown.

"These containers redefine accessibility," said Ken Malkoç, CEO of CMG Containers. "With full side access, clients can transform a simple storage unit into a mobile showroom, event booth, or flexible workspace — all within a durable steel structure built to last."

Redefining Versatility in Storage and Event Logistics

The introduction of CMG's Open Side Containers marks a new step in the company's mission to create modular systems that combine accessibility, strength, and design flexibility. These containers are built for businesses that prioritize efficiency, visibility, and adaptability — from warehousing and logistics to event management and retail environments.

By allowing side-by-side access to materials or products, the design encourages faster operations, better organization, and improved user experience on-site.

"Our Open Side Containers give clients complete control over how they use their space," added Malkoç. "It's more than just a container — it's a structure designed to adapt to your workflow."
