

Green Energy Mechanical Recognized as Heat Pump Leader by Mass Save

Green Energy Mechanical joins the elite Mass Save® Heat Pump Leaders Network, raising the bar for quality, efficiency, and community impact.

NEEDHAM, MA, UNITED STATES, October 21, 2025
/EINPresswire.com/ -- Green Energy Mechanical
Named to Mass Save® [Heat Pump Leaders Network](#)

Green Energy Mechanical, a leading HVAC and plumbing company serving Greater Boston, has officially been named to the Mass Save® Heat Pump Leaders Network (HPLN), a select group of contractors recognized for delivering top-tier design, installation, and customer service.

The HPLN was created to raise industry standards for residential and commercial heat pump installations. Participating contractors must follow strict quality control guidelines, complete accurate load calculations using ACCA-approved software, and design systems that meet the program's best practice standards. This ensures customers get a system sized and installed correctly from day one.

Green Energy Mechanical has committed to several key practices as part of this designation:

- Following industry best practices for design and installation
- Providing accurate load calculations for every project
- Partnering with home performance contractors to streamline energy assessments
- Offering Mass Save® rebates upfront instantly
- Providing extended labor warranties
- Supporting ongoing training and education for staff

This recognition comes at a time when Massachusetts is rapidly adopting clean energy technology. Heat pumps offer efficient heating and cooling, can lower energy costs and cut

carbon emissions. However they must be designed and installed correctly. Therefore, homeowners increasingly rely on experienced contractors to help them choose the right system, handle rebates, and ensure the installation is done correctly.

“Being named to the Heat Pump Leaders Network is a reflection of the standards we hold ourselves to every day,” said Jonathan Neves, Founder and CEO of Green Energy AC Heating and Plumbing Repair. “I’ve spent over 20 years in this industry, and I know how critical proper design and installation are. Our customers deserve to trust the company they work with. That’s exactly what this recognition stands for.”

As one of the select few minority-owned HVAC and plumbing companies in the Heat Pump Leaders Network, Green Energy brings an important perspective to the clean energy space. Its inclusion reflects both technical excellence and a commitment to building trust with a broad range of customers across the state.

“Being a Leader means holding ourselves accountable to the highest standards, making rebates easy to access, and ensuring customers get reliable systems that last,” Neves added.

For customers, working with a Heat Pump Leader provides peace of mind. The designation signals that the contractor is vetted for quality, trained in the latest technology, and committed to delivering a smooth, transparent experience. This includes correct system sizing, clean installations, extended warranties, and support navigating state rebates and incentives.

About Green Energy AC Heating and Plumbing Repair:

Founded in 2011 and with offices in Canton, MA, Needham, MA, and Lexington MA, Green Energy provides residential and commercial HVAC and plumbing services throughout Greater Boston. The company specializes in high-efficiency heating and cooling systems, including [heat pumps](#), ductless systems, and energy-saving plumbing repairs and installations. Known for its focus on quality, transparency, and customer care, Green Energy Mechanical is a [trusted partner](#) in Massachusetts’ clean energy transition.
