

Conserv Introduces CMV 400 Pharmaceutical+Commercial Refrigerator with WiFi Monitoring and Precision Temperature Control

HOUSTON, TX, UNITED STATES, October 20, 2025 /EINPresswire.com/ -- Conserv, a brand known for professional-grade, energy-efficient appliances, today announced the launch of the [CMV 400](#) Pharmaceutical + Commercial Refrigerator, a compact 3.9 cu. ft. refrigeration unit engineered for environments where accuracy and reliability are non-negotiable. Designed for both pharmaceutical and commercial applications, the CMV 400 provides advanced temperature control, real-time monitoring, and durable performance within a sleek, space-saving form.

Measuring 35 x 24 x 21.2 inches (HxWxD), the refrigerator's frost-free design ensures consistent cooling and clear visibility of stored contents. It maintains temperatures between 35.6°F and 46.4°F, safeguarded by high and low temperature alarms that alert users to any deviations. The open-door alarm adds an additional layer of protection, ensuring stored materials—whether vaccines, medications, or perishables—remain in optimal condition. Built with WiFi compatibility and a USB data port, the CMV 400 allows users to remotely monitor performance and retrieve temperature logs for compliance or recordkeeping. Inside, three durable grill shelves provide ample organization, illuminated by bright LED lighting that enhances visibility without affecting temperature stability.

Conserv Introduces CMV 400 Pharmaceutical + Commercial Refrigerator with WiFi Monitoring and Precision Temperature Control

The electronic control panel offers simple, button-based adjustments for seven essential settings including refrigeration, fan, defrosting, alarm, and lighting. For secure storage, the CMV 400 includes a key lock and adjustable feet, allowing for both freestanding or built-in installation. Certified by ETL for safety and reliability, the model is backed by a 1-year parts and labor warranty and operates efficiently on 110V power with R600a refrigerant for eco-conscious performance.

“From clinics and laboratories to cafés and retail counters, precision matters,” said a company spokesperson. “The CMV 400 was designed for professionals who require dependable refrigeration that’s as intelligent as it is durable—balancing high-performance cooling with smart monitoring and security features.”

About Conserv

Conserv Appliances, a division of Equator Advanced Appliances, specializes in compact, professional-grade appliances that combine performance, reliability, and modern design. From refrigeration to laundry and beyond, Conserv products are engineered to meet the needs of residential, commercial, and specialized environments with efficiency and style.
