

Medical Director Co. partners with TAMA, enabling graduates to open practices immediately

New partnership helps med spa professionals skip months of compliance delays.

DALLAS, TX, UNITED STATES, October 20, 2025 /EINPresswire.com/ -- [Medical Director Co.](#) has partnered with the [Texas Academy of Medical Aesthetics](#) (TAMA) to empower students and help them streamline the launch of their new med spas.

By linking training and oversight, we're cutting red tape and letting providers focus on what they do best—caring for patients.”

Blaz Korosec

The collaboration ensures that TAMA graduates can quickly transition from training to practice by connecting them with Medical Director Co.'s nationwide network of collaborating physicians.

For many nurses and physician assistants, the path to opening a med spa is slowed down by compliance requirements, especially securing a medical director. The process often takes months and drains resources.

With this new partnership, graduates can bypass those delays and begin seeing patients right away.

For Sarah Nguyen, RN, who faced a six-month wait to open her own med spa, the difference is huge. “I had the skills, I had patients waiting, but I couldn't legally practice,” she said. “With this new setup, nurses like me can move forward right after training.”

“We've seen too many promising professionals burn out before they even begin because of compliance hurdles,” said Blaz Korosec, CEO of Medical Director Co. “By linking training and oversight, we're cutting red tape and letting providers focus on what they do best—caring for patients.”

“Our students now graduate with both advanced skills and the legal backing they need,” added Kiara DeWitt, BSN, RN, CPN, founder of the Texas Academy of Medical Aesthetics. “It raises the bar for safety and professionalism across the industry.”

A timely solution in a growing market

The U.S. med spa market is one of the fastest-growing sectors in healthcare, expected to pass [\\$15.9 billion](#) by 2027.

That growth has come with greater scrutiny. States like Texas and Florida have recently increased enforcement against noncompliant clinics, leaving many new providers scrambling.

Medical Director Co. and TAMA's partnership is designed to make sure new med spa owners are both trained and compliant on day one.

The benefits include:

No months-long lag between training and legal practice.

Direct connection to licensed medical directors across multiple states.

Lower risk of shutdowns, fines, or malpractice claims.

Faster career launches for nurses, PAs, and entrepreneurs entering aesthetics.
