

GOGov Accelerates Growth in 2025 with 130+ Launches, New Market Expansion

Company grows local government footprint while expanding into transportation, marine, and special district sectors nationwide

ISLANDIA, NY, UNITED STATES, October 21, 2025 /EINPresswire.com/ -- GOGov, a government technology company serving municipalities, counties, and

special districts nationwide, today announced reaching nearly 600 government clients and launching more than 130 communities in 2025. The company expanded into three new market verticals, transportation infrastructure, marine and harbor districts, and special districts, while continuing to enhance its products.

Notable 2025 achievements include partnerships with Colorado Springs and Chattanooga, expansion into New Mexico, and collaboration with the New York State Department of Transportation for the I-81 Viaduct Project—NYSDOT's largest transportation infrastructure undertaking in history.

"Over 130 launches and counting this year—that's more than three every week," said Daryl Blowes, CEO of GOGov. "That pace reflects our operational efficiency and scalability."

Vertical Expansion Demonstrates Platform Versatility

GOGov's expansion into specialized government sectors validates platform adaptability:

Transportation Infrastructure: The [I-81 Connect mobile app](#) delivers real-time traffic alerts, construction updates, and direct communication for one of New York's most significant infrastructure projects.

Marine and Harbor Operations: GOGov launched solutions for Perry Marina in Key West, Florida, expanding into waterfront government operations.

Special Districts Nationwide: GOGov serves fire districts, sanitation districts, water agencies, and improvement districts across the country, from San Ramon Valley Fire District managing 6,000+ annual inspections to community development districts in Florida.

The expansion required no fundamental platform changes, validating architecture that

GOGov Accelerates Growth

addresses universal government challenges—citizen communication, service requests, inspections, and transparency.

Serving Communities Across the County

GOGov has averaged more than 3 municipalities launching GOGov solutions per week.

Colorado Springs, Colorado (population 500,000+) relaunched its GoCOS app with enhanced features, enabling residents to report issues and track requests effortlessly.

Chattanooga, Tennessee (population 180,000+) reimaged its [Cha 311 app](#) with GOGov technology, modernizing service request management.

Village of Pecos, New Mexico (population 1,400) became GOGov's first customer in New Mexico, demonstrating that sophisticated technology is accessible to communities of any size.

The company maintained an average pace exceeding three launches per week throughout 2025.

Platform Innovation Driven by Customer Needs

GOGov's 2025 product development focused on customer-identified challenges. New features include unified multi-channel notifications integrating SMS/Text, voice calling, email, mobile push notifications, and social media; precision geo-targeting for location-based alerts; and intelligent duplicate detection. Additional enhancements to all product lines are planned for 2026.

Strategic Growth and Industry Leadership

GOGov continued to expand its team in 2025 by over 20% with new hires across all departments and many more planned for 2026. The company participated in over 25 conferences throughout the country including influential national focused local government conferences: ICMA Annual Conference, NACo Annual Conference, and National League of Cities Annual Conference with more planned for 2026.

Demonstrated Outcomes Drive Adoption

GOGov implementations achieve measurable improvements in operational efficiency and citizen engagement. San Ramon Valley Fire District replaced paper records to manage 6,000+ annual inspections, reducing staff workload while improving response times. Costa Mesa Sanitary District streamlined operations by centralizing communication. Lincoln, Illinois consolidated code enforcement, permitting, and notifications with GOGov.

Positioned for Continued Market Leadership

With nearly 600 government clients and proven success across multiple verticals, GOGov enters 2026 positioned to accelerate growth.

"Expanding into transportation with NYSDOT's largest project, adding marine operations, growing our special district presence—we're proving platform versatility," Blowes said.

About GOGov:

GOGov is a Long Island-based Government Technology company dedicated to empowering government agencies and municipalities with cutting-edge technology solutions. GOGov is used

by millions of citizens in over 600 local governments and includes solutions for Citizen Requests, Code Enforcement, Citizen Notifications and Online Permitting & Licensing. The company's commitment to innovation and excellence continues to drive its growth and success in the government technology sector. Learn more at www.GOGovApps.com.
