

EACR Inc – Melville Launches Solar Panel Recycling Pickup Services Across Long Island

Convenient, compliant, and approved solutions for decommissioned and end-of-life PV modules in Suffolk & Nassau Counties

MELVILLE, NY, UNITED STATES, October 22, 2025 /EINPresswire.com/ -- EACR Inc – Melville today announced the launch of its solar panel recycling pickup services designed for businesses, schools, municipalities, solar installers, and property managers throughout Long Island and the greater Metro New York area. The new program makes it simple to remove and recycle end-of-life photovoltaic (PV) modules and related equipment with on-site pack-out, scheduled pickups, and approved downstream processing that prioritizes environmental responsibility and regulatory compliance.

Palletized Solar Panels for Recycling

“Solar has transformed the way Long Island powers homes and businesses,” said a spokesperson for EACR Inc – Melville. “Now, as more systems reach end-of-life or require replacement, our community needs a reliable, local partner to remove and responsibly recycle those materials. Our pickup service is built to be fast, cost-effective, and compliant—so projects stay on schedule and materials avoid landfill.”

Why this matters

Growing volumes of retired PV modules: Aging systems, storm damage, and upgrades are generating a steady flow of panels that require regulated handling and responsible recycling.

Local convenience: EACR’s pickup model eliminates the logistics burden of self-transport, helping teams focus on project work while meeting environmental goals.

Approved recycling outcomes: Materials such as aluminum frames, glass, and select metals are directed to approved downstream partners, helping reduce waste and recover valuable resources.

How the pickup program works

Request a quote: Share site details, quantities, and timelines (single locations or multi-site projects).

On-site pack-out: Trained crews provide safe removal, palletization, and loading to minimize breakage and downtime.

Secure transport: Materials are hauled directly to our approved recycling facilities.

Certificates of recycling: Upon completion, customers will receive a certificate of recycling confirming proper recycling.

Who it's for

Solar developers, EPCs, and installers managing decommissions, repowers, or warranty swaps

Commercial & industrial facilities upgrading rooftop or carport arrays

Schools, hospitals, and municipalities with sustainability and compliance objectives

Property managers & HOAs coordinating community-scale solar maintenance and replacements

Accepted materials

Crystalline silicon PV panels (mono & poly), thin-film modules, and broken or cracked panels

Inverters, optimizers, combiner boxes, racking/hardware, junction boxes, and wiring (by arrangement)

Palletized loads, loose panels, and mixed site conditions are supported—just note quantities during quoting

Service area & scheduling

Servicing Melville, NY, EACR's routing covers Suffolk County, Nassau County, and surrounding Metro NYC. Expedited pickups are available for storm response and critical timelines. The team accommodates everything from small batches to multi-megawatt decommissioning projects with

flexible scheduling that fits construction calendars.

Commitment to compliance & sustainability

EACR Inc – Melville emphasizes compliant, approved recycling practices that align with environmental standards and local regulations. The company's approach helps customers reduce landfill disposal, demonstrate ESG progress, and keep projects moving—without the hidden costs of improper handling.

Organizations planning a solar upgrade, repair, or full decommission can schedule a pickup or request a same-day quote from EACR Inc – Melville. Share your project details (location, counts, desired dates), and the team will provide a clear plan and pricing to match your schedule.

About EACR Inc – Melville

EACR Inc - Melville
105 Maxess Rd, Suite S124,
Melville, NY 11747
(631) 634-2440

EACR Inc – Melville provides electronics and solar panel recycling pickups for businesses, institutions, and municipalities across Long Island and Metro New York. The company helps clients streamline removals, meet regulatory obligations, and achieve sustainability goals with reliable logistics and approved recycling partners.
