## Why This Summit — Why Now

With global temperatures already 1.1°C above pre-industrial levels and nearly 140 countries pledging net-zero targets, the urgency to move from commitments to action is unprecedented.

The UN Net Zero Coalition underscores that the window to secure a livable climate is rapidly closing, requiring bold collaboration, new financing mechanisms, and localised transition solutions.

The International Net Zero Summit 2026 is positioned at this pivotal moment — bridging global dialogue with practical deployment across climate-smart industries, technology-led decarbonization, and circular economy models.

As nations struggle to balance industrial development with emission targets, INZS 2026 provides a multi-stakeholder platform to exchange scalable ideas, forge South–North partnerships, and strengthen the human capital needed for this transformation.
