

SERÁN BIOSCIENCE EXPANDS COMMERCIAL MANUFACTURING WITH NEW 100,000 SQ. FT. CAMPUS IN BEND, OREGON

The US facility is purpose-built to produce commercial-scale, non-sterile solid dose products with high scientific rigor and world-wide regulatory compliance.

BEND, OR, UNITED STATES, October 23, 2025 /EINPresswire.com/ -- Serán BioScience, LLC, a leading science-driven drug development partner (CDMO), today announced the completion of two of the three new buildings and commencement of construction of the third facility for of its new 100,000 ft² commercial manufacturing campus in Bend,

Oregon. The new campus will encompass a 50,000 ft² manufacturing facility, complemented by an adjacent 50,000 ft² space dedicated to specialized packaging and supply chain operations. The expansion marks a significant milestone in Serán's mission to provide fully integrated support from first-in-human (FiH) trials through commercial-scale production of small-molecule therapeutics.

“

Pharmaceutical companies are looking for partners who can not only optimize performance at the clinical stage but also deliver scalable solutions that accelerate time-to-market.”

Dan Smitley, CEO

regulatory compliance.

Rendering of Serán BioScience's new 50,000-square-foot commercial manufacturing facility in Bend, Oregon, currently under construction.

Enabled by a new investment from Bain Capital Life Sciences in September 2024, and continuing investment from Vivo Capital, the new greenfield site enhances Serán's ability to serve pharmaceutical innovators with a true end-to-end partner for complex oral solid dosage forms. Specializing in spray drying, particle engineering, and advanced drug formulation, the US facility is purpose-built to produce commercial-scale, non-sterile solid dose products with high scientific rigor and world-wide

“Our investment in commercial manufacturing capabilities is a direct response to the evolving needs of our clients,” said Dan Smithey, CEO of Serán BioScience. “Modern medicines are increasingly complex and thus require specialized development and manufacturing. Pharmaceutical companies are looking for partners who can not only optimize performance at the clinical stage but also deliver scalable solutions that accelerate time-to-market. This facility delivers on that promise. It was an honor to celebrate the groundbreaking this summer with Serán’s Board of Directors and Serán’s leadership. We are grateful for the partnership with our construction and design partners, Mortenson Construction, CRB Group and Blaise Cacciola (BCA).”

Adjacent to the new plant, Serán has completed two newly constructed warehouse and light manufacturing buildings totaling 50,000 ft². These facilities support advanced materials management, packaging, labeling, and other critical logistics functions essential for seamless scale-up and supply chain reliability.

Strategically located just minutes from Serán’s existing 90,000 ft² clinical development and manufacturing campus, the new commercial site will integrate with the company’s established clinical operations. The Bend campus houses over 190 highly skilled professionals and features 10 specialized buildings equipped with cutting-edge technologies including nano milling, micronization, dry and wet granulation, spray-dried dispersions, twin-screw melt extrusion, and more. These capabilities span the full spectrum of oral solid dose development, from early-phase formulation through clinical trial manufacturing, packaging, and labeling.

Serán’s expansion reflects its deep commitment to supporting both emerging biotech firms and large pharmaceutical organizations with flexible, science-forward solutions that translate innovation into commercially viable therapies.

For pharmaceutical leaders seeking a strategic manufacturing partner with deep scientific capabilities and an unwavering focus on quality and scalability, Serán BioScience now offers a comprehensive path from molecule to market.
