

ISOutsource Releases Interactive Q4 2025 IT Trends Report: The 2026 IT Planning Guide: Budget Smarter, Partner Better

SEATTLE, WA, UNITED STATES, October 28, 2025 /EINPresswire.com/ -- [ISOutsource](#), a leading managed services provider for small and medium-sized businesses (SMBs), today announced the release of its Q4 2025 IT Trends Report, The 2026 IT Planning Guide: Budget Smarter, Partner Better.

As 2025 comes to a close, most SMB leaders face a critical decision: stay the course with IT partners that no longer fit, or build a smarter, more flexible plan for 2026. The new report offers practical guidance, tools, and insights to help organizations rethink IT budgeting, vendor management, and strategic planning for the year ahead.

“

In today's fast-moving tech landscape, strategic IT planning isn't just a task; it's your competitive edge.”

Naveen Rajkumar, CEO and President of ISOutsource

“In today's fast-moving tech landscape, strategic IT planning isn't just a task; it's your competitive edge,” said Naveen Rajkumar, CEO and President of ISOutsource. “Invest in a smarter IT budget now, and you'll reap the rewards all year long.”

Based on over 200 responses from a survey that was sent

to 50,000 SMB leaders across Washington, Oregon, and Arizona, the report reveals that 87 percent of executives considered switching IT providers in the past year. The findings underscore a growing need for flexible service models, transparent vendor relationships, and measurable IT outcomes.

The [Q4 report](#) introduces ISOutsource's three-part planning framework, Protect. Optimize. Advance. This framework helps SMBs balance cybersecurity, cost efficiency, and business growth. It also includes new interactive tools for leaders to turn strategy into action, such as the Vendor Contract Scorecard, Switch-Readiness Quiz, and IT Model Selector Worksheet.

"As systems evolve, overspending slips through the cracks," said Kenny Gluck, Managing Consultant at ISOutsource. "We frequently discover that clients have been paying hundreds or thousands of dollars a month for legacy services they no longer use."

The report also outlines a 90-Day Switch Plan to help organizations transition vendors safely, along with detailed guidance for aligning IT investments to long-term business results.

The 2026 IT Planning Guide is the fourth installment in ISOutsource's quarterly IT Trends series, providing data-driven insight to help SMBs strengthen operations, enhance resilience, and plan for the future.
