NH, UNITED STATES, October 24, 2025 /

EINPresswire.com/ -- Author JL Thompson has unveiled her heartwarming and empowering children's book, "Where's My Learning Zone!," a vibrant celebration of virtual school life that provides young readers with relatable, accessible tools to thrive in online education.

This 37-page educational picture book follows Charlie, a curious virtual student, on his quest to find his unique "learning zone" - the perfect space where focus, comfort, and confidence intersect. Through trial and error, Charlie discovers that success in virtual school isn't about perfection but about creating a personal environment where he can flourish and enjoy the process of learning.

With over twenty years of teaching experience, including the past fourteen in virtual classrooms, Jennifer Thompson weaves her insights into an inspiring and relatable story that nurtures independence, emotional awareness, and a growth mindset in young learners.

"I wanted virtual students to see themselves represented in literature," says Thompson, "not as exceptions, but as empowered, capable learners."

This delightful work is one of the first children's books to highlight virtual education from a student's perspective, serving as an indispensable resource for families navigating distance learning while offering encouragement and practical strategies to help children feel seen, understood, and successful in online schooling.
