High volume of data generation in the aviation industry and surge in aviation passenger traffic have boosted the growth of the global aviation analytics market. However, dearth of analytically skilled workforce hinders the market growth. On the contrary, technological advancements are expected to open new opportunities for the market players.

Covid-19 scenario:

The Covid-19 pandemic had a negative effect on the aviation analytics market due to implementation of strict lockdown measures and restrictions of international flights. The pandemic led to various challenges including grounding of airplanes and low demand for air travel.
