

# Measure Simplifies Project Management for Construction Teams

SEATTLE, WA, UNITED STATES, October 28, 2025 /EINPresswire.com/ -- CoreUs™ today announced updates to [Measure](#), its mobile-first project management and collaboration tool designed specifically for builders, contractors, and field teams. Developed to address the complexity and inefficiency common in traditional construction software, Measure provides a streamlined way for crews and managers to stay organized, connected, and on schedule.

Unlike large-scale enterprise systems that can be cumbersome or feature-heavy, Measure focuses on essential tools that field teams actually use day to day - tasks, files, messages, and updates - all in one accessible platform.

## Key Features

- Mobile-first design: Built for teams on the go.
- Visual simplicity: Keep projects crystal clear with clean, easy-to-follow tracking.
- Fast setup: Get projects up and running in under an hour - no complicated training required.
- All-in-one communication: Say goodbye to scattered emails and text threads.

## Upcoming Webinar

To demonstrate how teams are applying these tools in real-world settings, CoreUs will host a free live webinar, "How to Run Jobs Without Expensive, Complicated Software," on November 6 at 11 AM CT. The session will highlight how construction professionals can reduce administrative overhead and improve coordination using simplified digital workflows.
