

Ocean Healthcare Group Fort Lauderdale Announces Cutting-Edge Stem Cell Therapy for Regeneration and Pain Management

FORT LAUDERDALE, FL, UNITED STATES, October 28,

2025 /EINPresswire.com/ -- [Ocean Healthcare](#)

[Group](#), a leader in integrative and regenerative medicine, proudly announces the launch of its [Stem Cell Therapy](#) Program, offering patients access to the newest breakthrough in [longevity](#) medicine — now legal and available in Florida.*

“

With stem cell therapy now legalized in Florida, we can deliver powerful, science-backed treatment options that support healing, rejuvenation, and long-term wellness.”

Dr. Vincent Jarvis

With the passing of Senate Bill 1768, effective July 1, 2025, stem cell therapy is now authorized under Florida Statutes §458.3245 and §459.0127 for orthopedics, wound care, and pain management. Ocean Healthcare Group is among the first medical facilities in South Florida to bring this innovative, ethically sourced treatment to patients seeking non-surgical solutions for joint pain, inflammation, and tissue degeneration.

“Our mission has always been to provide the safest and most effective regenerative treatments available,” said Board-Certified Primary Physician at Ocean Healthcare Group, Dr. Vincent Jarvis. “With stem cell therapy now legalized in Florida, we can deliver powerful, science-backed treatment options that support healing, rejuvenation, and long-term wellness.”

Ocean Healthcare’s stem cell products are:

Ethically sourced from umbilical cord and placenta

FDA registered, ISO7, and cGMP compliant

Cryopreserved to preserve potency and viability

Accompanied by a Certificate of Analysis confirming sterility and identity

Each stem cell treatment is administered by board-certified, Florida-licensed physicians, certified

in ultrasound-guided joint injections, ensuring precision and safety.

Stem cell and exosome therapies at Ocean Healthcare Group are designed to:

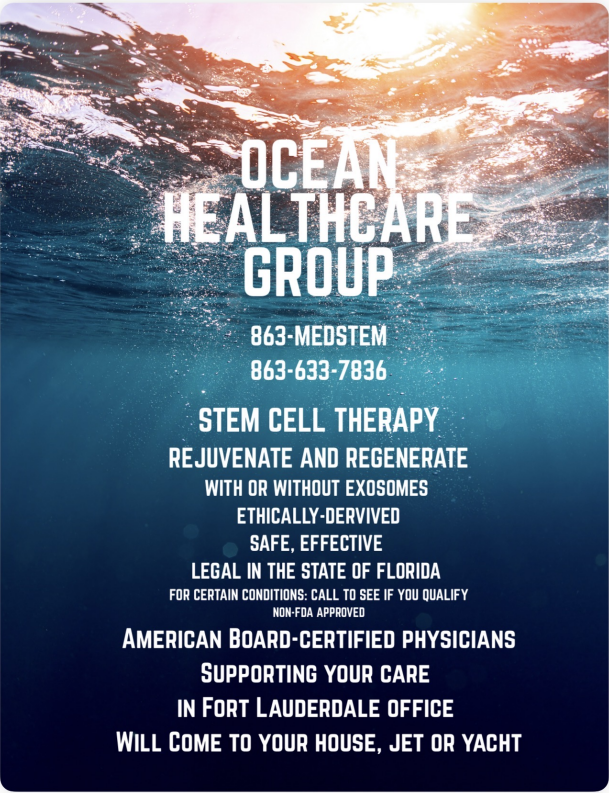

Reduce inflammation and chronic pain

Improve joint mobility and range of motion

Promote tissue regeneration and healing

Offer non-invasive, low-downtime alternatives to surgery

With growing demand for safe, legal regenerative options, Florida is now emerging as a destination for medical tourism, athletes, and aging individuals seeking ethical, American-trained care without the need for costly overseas travel.
