Customer voice — PA Direct Auto Sales

“After an EV in our inventory stalled on the Pennsylvania Turnpike, we faced an expensive tow. Drivers need a faster option. We plan to rent vehicles and EVChargeShare devices to gig workers so they can deliver charge on demand, and we're exploring an operating program with PennDOT and insurance partners.”

— Richard Kennedy, PA Direct Auto Sales

Executive perspective

“We have gas stations on every corner and people still run out of gas. EVs deserve the same safety net. On-scene V2V DC fast charging restores range in minutes, reduces costly tows, and

builds confidence to accelerate EV adoption.”

— Henry Behnke, Chief Operating Officer, EV Buddy Inc.

How EVChargeShare® works

1. Request a boost in the app or via dispatch.
2. A nearby Gig Driver arrives with a compact DC unit and delivers ~20 kW to reach home, work, or a fast charger.
3. Sessions are safe, verified, and logged—no donor-vehicle modifications required.
