

# FEDCON Remains Operational: All Services Continue Despite Government Shutdown

*FEDCON is operational at maximum capacity with no service disruption. The non-partisan essential platform operates independently*

TAMPA, FL, UNITED STATES, October 29, 2025 /EINPresswire.com/ -- [FEDCON](#) (FederalGovernment.info) is operational at maximum capacity with no service disruptions because of the current federal government funding shutdown. The non-partisan essential platform operates independently to provide citizens and federal workers and small businesses with a dependable resource that stays updated throughout the government instability period.

The statement "All Services Continue Despite Government Shutdown" confirms that all user resources and tracking systems and help lines operate at full capacity.

The political standoff in Washington does not impact our commitment to serve all Americans according to Marina Nicola who serves as Operations Manager at FEDCON. The direct appropriations process does not impact FEDCON because it operates independently which allows us to maintain all resources and tracking systems. Our organization maintains its mission to deliver clarity to people through our ongoing work during unstable times.

## Zero Interruption: What FEDCON Guarantees

The independent operation of FEDCON enables it to function as an essential resource which delivers vital information that government agencies cannot provide during their reduced operational period. The operational framework of FEDCON includes a strong infrastructure which operates independently from the daily federal budget funding cycles.

FEDCON dedicates its services to two essential groups which need assistance because of the shutdown:

**Citizens and Federal Workers:** The platform offers direct assistance through resources and guidance to help people handle their financial needs and handle reduced federal service impacts.

**Small Businesses and Contractors:** The platform provides continuous access to contracting officer contacts and agency forecasts and proposal development support to help them maintain

their federal procurement activities.

The consulting firm FederalGovernment.info updates official agency contingency plans in real-time to provide the public with verified information during government agency operations with reduced staff and limited digital access.
