

Lung Cancer Asbestos Victims Center Urges a Former Power Plant Worker Who Now Has Lung Cancer Anywhere in the Nation to Call If Before 1983 They Had on The Job Asbestos Exposure-Compensation Might Exceed \$100,000--or More

WASHINGTON , DC, UNITED STATES, November 4, 2025 /EINPresswire.com/ -- The Lung Cancer Asbestos Victims Center is urging a former power plant worker who has recently been diagnosed with lung cancer anywhere in the USA to please call them at 866-714-6466 if before 1983 they had routine exposure to asbestos on the job. Asbestos exposure can result in a heightened risk for the development of lung cancer. Financial compensation for a person like this might result in financial compensation that exceeds \$100,000.

The group says, "We have been assisting power plant workers who had significant exposure to asbestos on the job prior to 1983 and who have now developed lung cancer or the much rarer mesothelioma for over two decades. Most people like this are not aware of how significant the compensation might be if they develop lung cancer or mesothelioma as we would be happy to discuss anytime at 866-714-6466. We want to emphasize our asbestos exposure lung cancer initiative is nationwide.

"If your husband or dad is a former power plant worker, if he had workplace exposure before 1983, and if he now has lung cancer, please call us at 866-714-6466. We want to make certain a person like this gets compensated." <https://LungCancerAsbestosVictimsCenter.Com>

Important checklist for an individual or veteran seeking compensation if they had significant exposure to asbestos on the job before 1983 and they now have lung cancer:

- * The individual or veteran must have been exposed to asbestos prior to 1983 at their place of work or in the armed forces.

- * The lung cancer diagnosis must have been recent---preferably in the last one or two years.

- * The individual's or veteran's exposure to asbestos must have been substantial and must have involved exposure to asbestos involving more than one product. The ideal individual or veteran who now has lung cancer is one who worked as a mechanic, machinist, worked at a shipyard, at an oil refinery, chemical plant, factory, at a power plant worked as an electrician, welder, as a construction worker, plumber or pipefitter, or a member of a repair crew-maintenance crew.

“

"If your husband or dad is a former power plant worker, if he had workplace exposure before 1983, and if he now has lung cancer, please call us at 866-714-6466---get compensated."

Lung Cancer Asbestos Victims Center

- * The individual or veteran must be able to get specific about how, where and when they were exposed to asbestos-if they hope to receive the best possible financial compensation results.

The Advocate says, "We do not want to overwhelm an individual or veteran who now has asbestos exposure lung cancer with a long checklist-but to get compensated-all of these things will be necessary. Our appeal is nationwide. If

the person, we have just described sounds like your husband, dad or relative--please share this article with them or their family and have them call us at 866-714-6466."
