

Oasis Engineering Launches 'Ready Set Orange' Service to Accelerate Affordable Housing Permits in Orange County, Florida

The new service builds on Oasis Engineering's broader commitment to accessible, sustainable, and code-compliant residential design throughout the United States.

ORLANDO, FL, UNITED STATES, October 30, 2025 /EINPresswire.com/ -- [Oasis Engineering](#), a Florida-licensed structural and energy engineering firm, today announced the launch of its new [Ready Set Orange](#) service line, designed to help homeowners, builders, and investors streamline the permitting process for Orange County's pre-approved home and accessory dwelling unit (ADU) plans.

Orange County's Housing for All program made a library of architectural plans available to the public at no cost.

However, most properties still require site-specific engineering, [energy calculations](#), and drainage coordination before a permit can be issued. Oasis Engineering's new offering closes that gap—delivering a permit-ready engineering package in as little as 5–10 business days for a flat fee.

"We saw many homeowners excited about the County's designs but unsure how to take the final step," said Enrique Lairet, PE, Founder and Principal Engineer at Oasis Engineering. "Our mission is to make affordable housing practical — not just possible. Ready Set Orange turns free public plans into buildable, code-compliant homes."

Each package includes:

- Structural review and PE stamping for code compliance

Oasis Engineering

- Site, grading, and drainage plans based on the client's property survey
- Manual J/S/D energy calculations or Florida Energy Code documentation
- Truss and product-approval coordination for windows, doors, and roofing systems

Homeowners simply request the official Ready Set Orange plans directly from Orange County, then forward their approval and survey to Oasis Engineering. The firm handles all remaining technical steps required for permit submission.

The new service builds on Oasis Engineering's broader commitment to accessible, sustainable, and code-compliant residential design throughout Florida and the Southeast.

The firm plans to expand the model to other jurisdictions adopting pre-approved housing programs.

Ready Set Orange Partner

Our mission is to make affordable housing practical — not just possible. Ready Set Orange turns free public plans into buildable, code-compliant homes.”

Enrique Lairet, PE
