

TrioPBX Launches Cloud-Based VoIP and Hosted PBX Platform for Global Businesses

TrioPBX unveils an affordable, cloud-based PBX and contact center solution offering smart call management and CRM integration for growing businesses.

MELBOURNE, VICTORIA, AUSTRALIA, October 30, 2025 /EINPresswire.com/ -- [TrioPBX](#) today announced the official launch of its [cloud-based VoIP](#) and [hosted PBX](#) platform, built to help businesses streamline communication, manage customer interactions, and enhance productivity from anywhere in the world.

The platform offers a unified solution for voice calls, contact center management, and team collaboration — eliminating the need for costly on-premise phone systems. With advanced call routing, call recording, voicemail-to-text, and CRM integration, TrioPBX provides businesses with a complete communication suite designed for scalability and simplicity.

TrioPBX - Hosted PBX

“

We created TrioPBX to make business communication simple, scalable, and affordable for every organization.”

Muhammad Sohaib

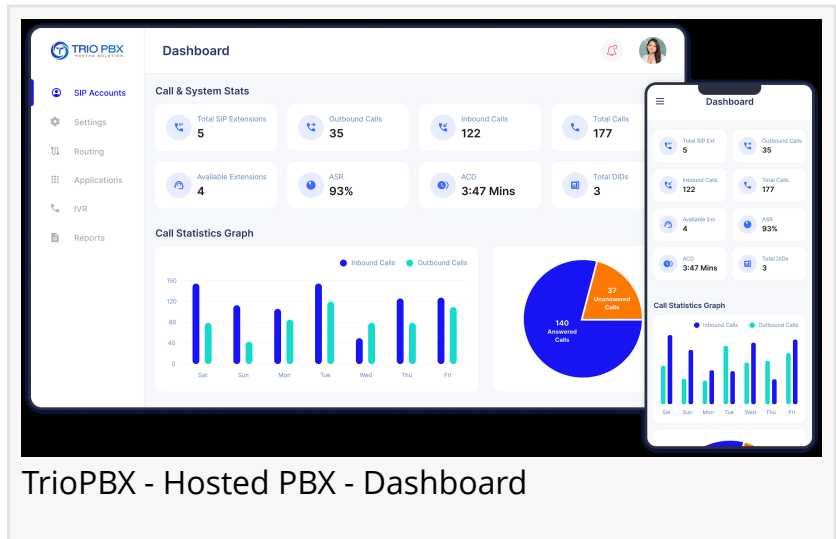

TrioPBX aims to make enterprise-grade communication accessible to startups and established organizations alike. The system supports global teams with a reliable VoIP infrastructure, ensuring clear, stable connections and real-time insights through built-in analytics.

“We built TrioPBX to simplify business communication without compromising quality,” said Muhammad Sohaib, Founder and CEO of TrioPBX. “Our mission is to give

businesses a smarter, more affordable way to manage calls, collaborate with teams, and deliver

better customer experiences.”

The platform’s user-friendly interface enables quick setup with minimal technical expertise. Businesses can deploy TrioPBX in minutes and manage operations through a secure online dashboard. The service is compatible with multiple devices, including desktops, softphones, and mobile apps, allowing users to stay connected wherever they work.

TrioPBX continues to evolve its platform with upcoming AI-powered voice features, such as call transcription and performance analytics, to help businesses make more data-driven communication decisions.
