

Ascend in Motion Expands Flat-Rate Coverage with 40 New City Routes Across Los Angeles Region

The latest Phase 2 expansion brings affordable, predictable flat-rate service between LAX and 40 additional cities including Anaheim, Arcadia, and Beverly Hills

LOS ANGELES, CA, UNITED STATES, October 31, 2025 /EINPresswire.com/ -- Ascend in Motion, Southern California's leading hybrid and luxury

transportation company, today announced the launch of 40 new Flat-Rate routes both ways between Los Angeles International Airport (LAX) and major cities across the region. This marks Phase 2 of the company's growing Flat-Rate Expansion Plan, designed to simplify travel and eliminate unpredictable surge or metered pricing that often burdens riders across Southern California.

“

Our mission is simple. We want to make premium transportation accessible, reliable, and transparent. Passengers should always know their cost before they ride”

Joseph Wilson COO of Ascend in Motion.

Los Angeles California

The newly added routes cover Anaheim, Agoura Hills, Alhambra, Arcadia, Artesia, Azusa, Baldwin Park, Banning, Beaumont, Bell, Bell Gardens, Bellflower, Beverly Hills, Brea, Buena Park, Burbank, Calabasas, Camarillo, Canoga Park, and Carson—extending Ascend in Motion's affordable flat-rate coverage to even more local communities.

Each of these new routes provides fixed, transparent pricing both to and from LAX, allowing travelers to know their total fare in advance—no hidden fees, no surge pricing, and no unexpected fluctuations. With this initiative, Ascend in Motion continues to make professional, reliable ground transportation accessible not only to visitors but also to Southern California residents who seek dependable alternatives to unpredictable rideshare models.

“Our goal has always been to combine comfort, fairness, and consistency,” said Joseph Wilson,

COO of Ascend in Motion. “This new phase of our flat-rate coverage gives travelers the peace of mind of knowing exactly what their trip will cost before they even book. Whether it’s a family heading to Disneyland in Anaheim or a business traveler going to Beverly Hills, everyone benefits from transparent, reliable rates.”

In addition to affordable pricing, Ascend in Motion’s fleet reflects a strong environmental commitment. All non-minibus vehicles are hybrid Toyota Sienna models, offering eco-conscious rides without compromising comfort. For larger groups, the company operates Mercedes-Benz Sprinter minibuses, ideal for business travelers, families, and tour groups.

Ascend in Motion’s operational reach now extends from Burbank and Pasadena in the north to Anaheim and Buena Park in the south, with service also reaching Calabasas, Camarillo, and Agoura Hills to the west. Each route is professionally managed with licensed, commercially insured drivers, ensuring punctual curbside pickups and premium comfort from start to finish.

The company is certified under California CPUC TCP #41350 and is fully permitted by Los Angeles World Airports (LAWA) for direct curbside pickups at LAX.

Every trip includes proactive flight tracking, complimentary waiting periods for airport arrivals, and optional Meet & Greet services for added convenience.

By introducing these 40 new city connections, Ascend in Motion reinforces its mission to deliver affordable luxury, transparency, and reliability—qualities that have made it a top-rated provider with hundreds of five-star reviews from local and international travelers.

This phase is part of a continuing effort to eventually cover all major Southern California destinations, enabling travelers to book one-way or round-trip flat-rate transfers to or from LAX and other regional points of interest including cruise ports, theme parks, and entertainment districts.

Enhancing Regional Mobility with Flat, Predictable Pricing

The flat-rate model ensures that travelers pay a fixed price regardless of traffic conditions, time of day, or temporary surges. Whether it's a morning business flight or a late-night return, Ascend in Motion maintains uniform pricing across every route.

Fleet Designed for Comfort and Sustainability

With a lineup that includes hybrid minivans and luxury Mercedes-Benz Sprinters, Ascend in Motion's fleet minimizes environmental impact while maintaining luxury-class standards. Each vehicle is cleaned, inspected, and maintained daily to meet strict operational and safety requirements.

Commitment to Transparency and Local Communities

Residents in cities like Anaheim, Beverly Hills, and Burbank now have access to fixed-rate travel options that make airport commutes simple, fair, and stress-free. The company's approach supports local mobility while reinforcing Los Angeles' growing focus on sustainable travel solutions.

Future Expansion and Accessibility

Ascend in Motion plans to continue expanding its Flat-Rate Network to additional cities over the coming months, further enhancing connectivity across Southern California.

Founded in 2021, Ascend in Motion provides premium and economy ground transportation services specializing in LAX airport transfers and private car service across Southern California. The company operates a fully permitted and commercially insured fleet, offering hybrid Toyota Sienna vehicles and luxury Mercedes-Benz Sprinters for groups up to 14 passengers.

Ascend in Motion is headquartered in Los Angeles and operates under California CPUC TCP #41350.
