The Business Research Company

This surge during the historical period can be linked to the growing recognition of efficient waste management and escalating governmental efforts for medical waste disposal.

The sector of medical waste management is anticipated to witness significant expansion in the upcoming years, eventually reaching a market size of \$24.08 billion in 2029 with a CAGR of 5.2%. The growth expected during this period is linked to the increasing usage of disposable medical products, acceptance of new guidelines by key industry leaders, advent of innovative technologies, and

the rising quantity of medical waste. The prediction period will also see some major trends such as the adoption of novel therapeutic approaches, embracing of emergent technologies such as microwaving technology, incorporation of new recycling services, industry mergers and acquisitions, and the uptake of eco-friendly waste treatment measures.

What Are The Current Leading Growth Drivers For Medical Waste Management Market?

The Business
Research Company

The Business Research Company

The anticipated surge in the utilization of single-use medical items in healthcare establishments is predicted to propel the medical waste management market forward. To prevent cross-infection among patients and reduce the incidence of hospital-acquired infections, a majority of products employed in healthcare environments are designed for a single-use. There's been a significant rise in the use of disposable products due to the outbreak of the COVID-19 pandemic. Common disposables such as surgical gloves, disposable bed sheets, masks, surgical gowns, syringes, intravenous saline bags, and the like contribute to a substantial portion of hospital waste. Consequently, the increasing application of disposable medical goods is likely to stimulate the expansion of the medical waste management market.

Which Companies Are Currently Leading In The Medical Waste Management Market?

Major players in the Medical Waste Management include:

- Stericycle Inc.
- Waste Management Inc.
- Veolia Environmental Services
- Clean Harbors Inc.
- Suez Environmental Services
