”

The Business Research Company

projected to increase from \$32.21 billion in 2024 to \$34.84 billion in 2025, with a compound annual growth rate (CAGR) of 8.2%. This upward trend during the past period is largely due to factors such as a higher demand for real-time supervision, an escalating need for effective risk management, growing concerns about security, economic development, and the intricate nature of operations.

[The market size of the operations command center](#) is predicted to experience notable expansion in the coming years, reaching a value of \$47.47 billion in 2029 with a compound annual growth rate (CAGR) of 8.0%. Factors

contributing to this predicted growth in the forecast period include a heightened focus on safety and emergency responses, international business expansion, an increasing necessity for risk management, proliferation of smart city projects, and a rising demand for disaster recovery solutions. The forecast period is also expected to see key developments such as the adoption of AI and machine learning, incorporation of IoT devices, a surge in cloud-based solutions, advancements in data visualization tools, and a reinforced focus on cybersecurity measures.

What Are The Major Factors Driving The Operations Command Center Global Market Growth?

The escalation in cybercrimes and security breaches is anticipated to drive [the expansion of the operations command center market](#). The high risks posed by cybercrimes and security violations to business entities demand strong cybersecurity tactics and alert supervision to safeguard confidential data and uphold operational coherence. The escalating threats from cybercrime and security breaches are a result of the evolution of increasingly advanced attacks and the broadening digital presence of companies. An operations command center acts as a shield against such heightened cybercrime and security breach threats by offering centralized supervision, real-time threat identification, and synchronized incident response. For example, Check Point Software Technologies Ltd., a US company, providing cyber security solutions to business enterprises and governments, reported in February 2023 that cyberattacks rose by 38% in 2022 compared to the preceding year, with businesses witnessing an average of 1,168 attacks weekly. Thus, the escalating risks from cybercrime and security breaches will stimulate the expansion of the operations command center market.

Who Are The Leading Companies In The Operations Command Center Market?

Major players in the Operations Command Center include:

- Microsoft Corporation
- Huawei Technologies Co. Ltd.
- Hitachi Ltd.
- Siemens AG
- Lockheed Martin Corporation
- General Electric Company
- International Business Machines Corporation (IBM)
- Deloitte Touche Tohmatsu Limited
- Cisco Systems Inc.
- Oracle Corporation

What Are The Prominent Trends In The Operations Command Center Market?

Top firms in the operations command center industry are increasingly exploiting cloud-based solutions that incorporate intelligence and machine algorithms, such as AI-enabled radiology command stations, to maximize automation and efficiency in pivotal operations and decision-making processes. These AI-enabled radiology command centers use artificial intelligence to bolster diagnostic precision, optimize workflow, and elevate patient care within radiology units. For example, in October 2023, NewVue, a radiology company from the US, unveiled the cloud-supported EmpowerSuite. It is merged with PACS, providing a coordinated radiology dashboard for healthcare institutions by accumulating data from various systems. The use of AI refines workloads and simplifies administrative tasks by encapsulating patients' history and clinical data. Also, the platform employs AI to aggregate clinical information from different systems, even out

radiologists' workloads and reading preferences, and incorporate crucial clinical, administrative, and regulatory procedures. Furthermore, the platform offers features that acknowledge and appreciate radiologists' efforts, enhance job contentment and increase efficiency via gamification components.

What Are The Primary Segments Covered In The Global Operations Command Center Market Report?

The operations command center market covered in this report is segmented –

- 1) By Component: Hardware, Software, Services
- 2) By Application: Public Safety And Security, Transportation Management, Utilities Management, Industrial Management, Business Application, Other Applications
- 3) By End User: Utility Sector, Transportation Sector, Industrial Sector, Data Centers, Colocation Facilities, Other End Users

Subsegments:

- 1) By Hardware: Servers And Storage Devices, Display Screens (LED, LCD, OLED), Control Consoles, Workstations And Computers, Networking Equipment (Routers, Switches), Sensors And Monitoring Devices
- 2) By Software: Operational Intelligence Software, Data Analytics And Visualization Tools, Incident Management Software, Network Monitoring And Management Software, Collaboration And Communication Software, Security And Surveillance Software, Automation And Control Systems
- 3) By Services: System Integration Services, Consulting Services, Training And Support Services, Maintenance And Managed Services, Cloud Services For Data Storage And Analytics, Custom Development Services
