-- Prime 1 Studio is pleased to announce the latest addition to its Ultimate Premium Masterline series: Sol Badguy from "GUILTY GEAR -STRIVE-".

This 1/4 scale statue represents the protagonist of the long-running fighting game series developed by Arc System Works. The piece is designed to capture the distinct "cel-look" visual style of the game by using color separation and layered shading to achieve an anime-like appearance with realistic depth and texture.

Sol Badguy is depicted in a dynamic stance, emphasizing his muscular build, costume details, and weapon—the Outrage Mk.II. The statue includes two interchangeable right arms and two left hands, allowing for multiple display options.

The base features the character's special move, "Heavy Mob Cemetery," with flames created using clear parts to express the visual effects of his Dragon Install transformation. Built-in LED lighting enhances the presentation by illuminating key areas of the statue.

The Bonus Version includes an additional head part featuring Sol's recognizable smirk, inspired by key visuals from the series.
