

How Cloud-Based EDI Improves Supply Chain Visibility Across Global Partners

PITTSBURGH, PA, UNITED STATES, November 4, 2025 /EINPresswire.com/ -- Global supply chain disruptions are causing many companies to switch to cloud-based Electronic Data Interchange, better known as EDI, to gain more visibility into their operations. [EDI systems](#) eliminate delays and errors that teams would inevitably face from relying on outdated and/or manual processes.

A lack of visibility into the supply chain can ultimately lead to operational challenges and financial repercussions. These may include mismanaged inventory, unmet customer expectations, and lost efficiency from your team due to manual error rework.

[Cloud-based EDI](#) standardizes communication between trading partners and streamlines each process from purchase orders to shipment notifications. This gives businesses a live, end-to-end view of their supply chain, enabling them to spot issues earlier and make proactive, data-driven decisions.

Shifting to a more connected and automated setup is a key move for companies in our modern age in order to focus on staying resilient and growing. Many companies look to solutions such as TrueCommerce for trusted [EDI and VMI solutions](#) to streamline their operations and build stronger relationships with partners around the globe.

For businesses looking to build a more responsive supply chain, switching to a cloud-based EDI is the best place to start.
