

RegDOX Achieves FedRAMP Moderate Equivalency; Independent C3PAO Attestation Confirms Controls

Independent C3PAO attestation confirms RegDOX's secure collaboration platform meets FedRAMP Moderate Equivalency standards.

NASHUA, NH, UNITED STATES, November 4, 2025 /EINPresswire.com/ -- RegDOX Solutions Inc., a leading provider of secure collaboration for Controlled Unclassified Information (CUI), announced today it has achieved [FedRAMP Moderate Equivalency](#).

Following an independent assessment by A²LIGN, an accredited CMMC Third-Party Assessor Organization (C3PAO), RegDOX received a Letter of Attestation confirming that the [RegDOX Secure Data Room Service](#) (SDRS) meets security control requirements equivalent to the FedRAMP Moderate baseline.

“

Equivalency gives customers the assurance they need to meet federal security obligations without sacrificing usability”

Napoleon O'Brien, CTO

“This is a defining milestone for RegDOX and our customers,” said William O'Brien, CEO of RegDOX Solutions Inc. “It reinforces our commitment to safeguarding sensitive data while enabling teams to collaborate seamlessly and confidently in a secure, compliant environment.”

“Equivalency gives customers the assurance they need to meet federal security obligations without sacrificing usability,” added Napoleon O'Brien, CTO. “With audited controls and a streamlined user experience, organizations can handle CUI productively and securely.”

FedRAMP Equivalency is particularly significant for organizations operating under DFARS 252.204-7012, NIST SP 800-171, and CMMC. By meeting this benchmark, RegDOX delivers strong, third-party-attested assurance for defense and public-sector collaboration, pairing audited security with the productivity features teams rely on for handling CUI.

This achievement builds on RegDOX's [ISO/IEC 27001 certification](#), renewed this year, and reflects the company's ongoing alignment with federal requirements and industry best practices.

RegDOX's FedRAMP-equivalent environment is available immediately for customers handling regulated information requiring elevated protection.
