Smart Sleep Meets Thoughtful Design

CoolNest System

Sweet Nights CoolNest Mattress

CoolNest™ Mattress was engineered with total body health in mind. Each mattress features ACA-certified 5-Zone Ergonomic Support, endorsed by the American Chiropractic Association for its proven ability to promote proper spinal alignment.

The zoned structure provides differentiated support for five areas — head, shoulders, lumbar, hips, and legs — relieving pressure points and ensuring even weight distribution. This design makes the CoolNest™ one of the best mattresses for back pain with cooling and a top choice for couples seeking both comfort and motion isolation.

To guarantee durability and quality, SweetNight's foams are CertiPUR-US® and OEKO-TEX® Standard 100 certified, meeting strict standards for safety and environmental responsibility. The brand also holds ISPA 2025 certification and complies with California's environmental and material safety requirements, reinforcing its reputation for thoughtful, sustainable manufacturing.

Designed for Hot Sleepers: The CoolNest™ Advantage

SweetNight's CoolNest™ Mattress brings together advanced engineering and thoughtful design to solve one of the most common sleep struggles — overheating. Built with the brand's exclusive Triple Cooling System, this mattress delivers instant, long-lasting, and deep cooling through three specialized layers:

1. **Cool-to-the-Touch Cover:** The first layer of defense against heat, this ice silk surface provides a refreshing feel on contact, immediately drawing warmth away from the body.
2. **PCMFlux™ High Resilience Foam:** This smart temperature material balances heat dynamically for up to eight hours, adapting to body temperature and seasonal changes to ensure uninterrupted comfort.
3. **Gel-Infused Memory Foam:** The final cooling layer promotes continuous airflow, dispersing trapped heat efficiently for a consistently cool and dry sleep surface.

Together, these layers make the CoolNest™ Mattress one of the best cooling mattresses for hot sleepers — and a leading mattress that up to 8 degrees cooler than traditional memory foam beds at the surface.
