

DevSecOps as a Service Enables IBN Technologies to Advance Enterprise Security Innovation

IBN Technologies drives enterprise security and innovation through DevSecOps as a Service, ensuring faster, safer delivery.

MIAMI, FL, UNITED STATES, November 5, 2025 /EINPresswire.com/ -- In today's ever-evolving digital ecosystem, the pursuit of faster software delivery has become a defining priority for modern enterprises. However, this growing demand for speed often amplifies security risks that can undermine business stability. [DevSecOps as a Service](#) is revolutionizing how organizations approach software engineering by embedding security throughout the entire development lifecycle. From conceptual planning and code creation to testing and deployment, this integrated methodology ensures that security is intrinsic to the process eliminating afterthoughts, reducing vulnerabilities, and safeguarding organizational reputation.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

At the forefront of this transformation, IBN Tech is pioneering DevSecOps as a Service to drive innovation without compromising security. By merging development, security, and operations into a unified ecosystem, IBN Tech enables faster, safer, and more efficient delivery of software solutions. This holistic approach enhances agility, reliability, and compliance across projects, reinforcing the company's commitment to building secure, scalable, and future-ready systems in a rapidly shifting digital environment.

Transform development speed and safety through DevSecOps as a Service innovation

Critical Software Security Challenges Demanding Swift Action

Traditional security approaches are proving inadequate in today's agile development environments, leading to several critical obstacles:

- Isolated security tools that result in visibility gaps and misaligned operations
- Manual compliance reviews introducing release delays and regulatory risk
- Developer frustration with rigid security checkpoints that slow delivery
- Limited availability of DevSecOps expertise straining already thin resources
- Challenges embedding Infrastructure as Code scanning and SAST into CI/CD pipelines

IBN Tech DevSecOps Platform – Core Service Portfolio

IBN Tech's DevSecOps as a Service platform offers an integrated service ecosystem designed to infuse security into every development process and eliminate systemic weaknesses:

- DevSecOps Assessment & Roadmap: Conducts a maturity audit to reveal process, tooling, and pipeline deficiencies, generating a targeted roadmap to accelerate DevSecOps adoption.
- Secure CI/CD Integration: Incorporates advanced tools like SonarQube, Fortify, and Snyk for SAST, SCA, and DAST, automating vulnerability scans while embedding security gates in the CI/CD workflow.
- Secure Cloud DevOps Pipelines: Strengthens AWS and Azure deployments using "policy as code," eradicating configuration errors and guaranteeing consistent cloud security governance.
- Secure Code Practices & Developer Enablement: Promotes a security-aware culture through coding best practices, training programs, and issue triage processes offering actionable security insights.
- Governance, Compliance & Reporting: Enables automated evidence generation aligned with SOC 2, ISO 27001, GDPR, and HIPAA, simplifying compliance management and reducing manual audit fatigue.

Client Success: Secure Development, Faster Delivery

By adopting DevSecOps as a Service, organizations are bridging the gap between speed and security, ensuring continuous delivery without compromising protection.

- One leading financial enterprise enhanced its development ecosystem by integrating automated testing, live security monitoring, and built-in compliance checks across its CI/CD pipelines.
- The initiative led to a 40% decline in critical vulnerabilities detected early in development, a 30% reduction in release times, and a stronger culture of innovation aligned with robust security principles.

Empowering Growth with DevSecOps

Organizations implementing DevSecOps as a Service are experiencing measurable gains in delivery efficiency and built-in security. One major financial institution redefined its development

operations by embedding automated security scans, real-time monitoring, and compliance validation into its CI/CD pipelines. This integration bridged the gap between development and security teams, driving quicker software rollouts, enhanced compliance assurance, and greater reliability with every release.

As digital transformation accelerates, the importance of embedding security within delivery pipelines has become undeniable. MRFR reports that the global DevSecOps as a Service market, valued at \$6.59 billion in 2022, is forecasted to grow to \$23.5 billion by 2032 evidence of the sector's rapid momentum. In this dynamic environment, IBN Tech's DevSecOps as a Service stands out for combining automation, governance, and continual improvement. With a focus on proactive defense and operational resilience, IBN Tech empowers enterprises to create scalable, compliant, and future-ready digital ecosystems.

About IBN Technologies

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.
