

LogicWeb Expands Global Footprint with VPS Hosting in 6 Strategic Locations for Unmatched Performance and Reliability

LogicWeb announces enhanced global accessibility with VPS now available across six locations: New York, London, Singapore, Frankfurt, Hong Kong, and Tel Aviv.

LOGICWEB

Ultra Fast VPS Hosting

NEW YORK, NY, UNITED STATES,

November 5, 2025 /EINPresswire.com/ -- LogicWeb, a privately owned leader in high-performance VPS hosting since 2004, today announced enhanced global accessibility with VPS hosting services now available across six prime data center locations: New York, London, Singapore, Frankfurt, Hong Kong, and Tel Aviv. This strategic expansion empowers businesses

worldwide to deploy lightning-fast, NVMe-powered virtual private servers closer to their audiences, minimizing latency and maximizing uptime for mission-critical applications.

“

What I like the best about LogicWeb is that it provides Services and excellent customer support. We leased 2 VPS servers and had a good experience with them and we got frequent assistance and support.”

Raam K.

In an era where digital speed and security define success, LogicWeb's global VPS hosting solutions stand out by combining cutting-edge infrastructure with customer-centric features that outpace competitors. Unlike publicly traded giants burdened by shareholder pressures and frequent price hikes, LogicWeb remains privately owned, allowing unwavering focus on innovation, affordability, and

long-term client partnerships. Established in 2004, the company has built a reputation for reliability, serving innovative enterprises like CyberGhost, NordVPN, Fiserv, and Hotspot Shield without the hidden fees or upsell tactics common in the industry.

"Choosing the right VPS hosting provider isn't just about specs—it's about trust, speed, and global reach," said Chad Abizeid, CEO of LogicWeb. "Our six global locations deliver dedicated NVMe storage and KVM virtualization where it matters most, ensuring sub-10-second DDoS mitigation and 99.99% network SLA. We've been privately owned since 2004, which means no corporate red tape—just pure value for growing businesses tired of overpriced, underdelivered

services."

Why LogicWeb's Global VPS Hosting Outshines the Competition

LogicWeb's VPS hosting with NVMe isn't just faster—it's engineered for the real-world demands of e-commerce, gaming, fintech, and SaaS platforms. Here's how it rises above the rest:

Strategic 6 Global Locations for Low-Latency Performance: Deploy in New York for North American dominance, London for European efficiency, Singapore for Asia-Pacific scalability, Frankfurt for GDPR-compliant operations, Hong Kong for East Asian connectivity, or Tel Aviv for Middle Eastern innovation. Competitors often limit options to 2-3 regions, forcing unnecessary data hops that inflate costs and slow user experiences.

NVMe Standard for 10x Faster Than SSD: Every plan includes blistering NVMe SSDs with dedicated cores (up to 24), RAM (up to 24GB), and storage (up to 500GB), delivering IOPs and throughput that crush legacy SSD-based VPS from providers like DigitalOcean or Linode. No shared resources—pure isolation for your workloads.

Enterprise-Grade DDoS Protection Included: Volumetric Shield neutralizes attacks in under 10 seconds at no extra cost, a feature often gated behind premium add-ons elsewhere. Paired with unmetered bandwidth upgrades (up to 1Gbps for \$250/mo), it's ideal for high-traffic sites without the surprise bills.

Flexible IP Leasing Without Limits: Lease bulk IPv4 subnets up to /22 (\$400/mo) or snag a /48 IPv6 for only \$10/mo—perfect for scaling without the scarcity issues plaguing AWS or Vultr. Additional IPv4 starts at just \$3/mo, with all ports open for unrestricted configurations.

Instant Activation and Free Intuitive Control Panel: Skip the waitlists; servers spin up in seconds with 20+ Linux distros (AlmaLinux, CentOS, Debian, Rocky Linux, Ubuntu) and panels like aaPanel, CyberPanel, or Webmin. Our mobile-friendly dashboard offers one-click reboots, VNC/SSH access, stats monitoring, and OS reinstalls—far more user-friendly than clunky competitor interfaces.

Affordable, Transparent Pricing with No Hidden Fees: Starting at \$5/mo for the v.box two (2 cores, 2GB RAM, 25GB NVMe, 2TB bandwidth), plans scale to the beastly vpx.three (\$150/mo: 24 cores, 24GB RAM, 500GB NVMe). Enjoy a 30-day money-back guarantee (excluding large IP leases), 24/7 in-house support via ticketing, and payment flexibility (AMEX, Visa, PayPal, ACH, wire)—no crypto hassles or subscription traps.

Proven Track Record Since 2004: As a privately held company, LogicWeb avoids the volatility of VC-funded rivals, delivering consistent 99.99% uptime and zero price gouging. Over 165+ five-star reviews praise our efficiency: "LogicWeb provides services and excellent customer support—they respond quickly and got us frequent assistance," raves one G2 reviewer.

Businesses leveraging LogicWeb's affordable VPS hosting report up to 40% lower latency and doubled website traffic compared to regional-only providers. With ROOT access, self-managed flexibility, and options for enhanced add-ons like +10TB bandwidth (\$15/mo), it's the go-to for developers and enterprises seeking DDoS protected VPS hosting without compromise.

Ready to experience global VPS excellence? Visit LogicWeb VPS Hosting to configure your server today and unlock instant activation in your ideal location.
