

C3 Solutions Announces Launch of 2026 State of Yard and Dock Management Survey

C3 Solutions kicks off its 2026 Yard & Dock Survey to uncover how automation and smarter operations are shaping logistics.

MONTREAL, QUÉBEC, CANADA,
November 10, 2025 /

EINPresswire.com/ -- [C3 Solutions](#), a

global leader in yard and dock

management solutions, today

announced the launch of its annual

survey for the upcoming "State of Yard

and Dock Management 2026" report. Building on insights from the 2025 report, which highlighted critical challenges including labor shortages, manual inefficiencies, and limited real-time visibility, the 2026 edition seeks to explore deeper into challenges facing the industry today in yard and dock management.

“

Dock and yard management is at a pivotal juncture. This survey will provide invaluable insights to help organizations make informed, strategic decisions.”

Marc Tomkinson, CTO of C3 Solutions

The 2026 survey focuses specifically on how logistics professionals view the role of automation within their operations. Key survey areas include identifying supply chain segments most in need of automation, critical operational challenges, and confidence levels regarding predictive intelligence.

Highlights of the new survey include:

□ Automation Readiness: Pinpointing which areas of the supply chain (warehouse, transport, yard, dock) are most in

need of automation.

□ Technology Landscape: Evaluating current systems such as YMS, TMS, DSS, and ERP tools, and the satisfaction levels driving (or hindering) adoption.

□ Predictive Capabilities: Measuring how far organizations have integrated predictive intelligence for disruption management, forecasting, and scheduling.

"The dock and yard management landscape is at a pivotal juncture," said Mark Tomkinson, CTO of C3 Solutions. "We're particularly keen to understand how logistics and supply chain professionals are integrating automation into their operations and how these technologies can mitigate prevalent industry challenges."

C3 Solutions invites supply chain and logistics professionals across industries (retail, grocery, manufacturing, post & parcel, and warehousing) to participate in the survey. The results will inform strategic discussions on future industry trends, highlight best practices, and underscore the transformative impact of technology-driven solutions in logistics.

Professionals interested in contributing their insights can [access the survey here](#). Results will be analyzed and published in the comprehensive "State of Yard and Dock Management 2026" report, expected to be available in early 2026.
