

How Vantage Fit's Latest AI Feature Helps Companies Turn Health Data into Wellness Impact

The AI-driven feature gives HR professionals aggregated health insights to power data-backed wellness strategies and proactive risk management

CALGARY, ALBERTA, CANADA,
November 7, 2025 /EINPresswire.com/

-- Vantage Fit, an AI-empowered global corporate wellness platform, has launched a new lab report upload and risk analysis feature designed to make employee health management smarter, faster, and more secure for organizations worldwide.

“

Corporate wellness needs to move beyond step counts. It's about understanding real health indicators and taking proactive action, and that's exactly what the motive of this feature launch is”

*Mr. Anjan Pathak, Co-founder
of Vantage Fit*

The update helps HR teams gain actionable workforce health insights through automated report processing, privacy-first data handling, and AI-driven analytics, all in one platform.

While employees can self-upload their medical reports directly through the Vantage Fit app, HR teams can safely upload bulk lab reports via SFTP. Employees receive immediate biomarker analysis after uploading, providing them with real-time insight into their health metrics while maintaining the anonymity of all data.

AI-Powered Report Processing: Vantage Fit's advanced AI

instantly analyzes lab results and classifies potential health risks. The insights help companies monitor employee health trends and create measurable and focused wellness programs.

Privacy-First: The feature is designed around strict data privacy principles. Individual employee information is kept completely private, and HR teams only have access to aggregated and anonymized workforce health data. This ensures employee trust and compliance with global data protection standards.

Smarter Wellness Decisions with Actionable Insights: The new Health Insights Dashboard visualizes workforce potential risk levels, highlights nutritional gaps, and tracks health improvements over time. The interactive dashboard offers a comprehensive visualization of workforce health metrics, providing HR teams with an overview of aggregated employee biomarker data that can be viewed at an organizational level. By turning raw health data into actionable insights, the feature enables HR and wellness leaders to design targeted, data-driven wellness programs and monitor their impact over time. This data-led approach allows organizations to make informed decisions that improve employee well-being and organizational performance.

Anjan Pathak, Co-founder of Vantage Fit, stated, "Corporate wellness needs to move beyond step counts and fitness challenges. It's about understanding real health indicators and taking proactive action, and that's exactly what the motive of this feature launch is."

About Vantage Fit: Vantage Fit is a comprehensive AI-powered employee wellness app provided by Vantage Circle that is designed for enterprises. It is a one-stop solution for corporates of all sizes looking to warrant employee well-being. Vantage Fit promotes healthier lifestyles and habits for preventive health and fitness. It has a built-in framework for fitness challenges. The app tracks physical activities such as walking, running, and workouts. Using a gyroscope sensor and GPS data, the mobile app also maps outdoor activities such as runs, jogs, and even evening walks. Clients include, ITC, IBS Software, Accenture, Landmark Group FirstSource, CITI Bank and many more.
