

EnigmaFund VC launches Strategic Base Reserve DTF to support Coinbase's Base Chain Projects

Strategic Super Reserve launches the Strategic Base Reserve with USD \$100,000 and allocates funds to their first cohort of Base assets.

BELIZE CITY, BELIZE, BELIZE, November 7, 2025 /EINPresswire.com/ -- [EnigmaFund](#) Venture Capital's [Strategic Super Reserve](#) has officially launched the Strategic Base Reserve DTF on Reserve Protocol.

Decentralized Token Folios are a selection of assets that represent the best of a chain, ranging from critical infrastructure protocols to memes. Unlike ETFs, DTFs are community-governed, on-chain, and require no KYC. By simply buying the \$SBR token, anyone can gain exposure to the basket of assets.

Anyone interested in participating in community governance and benefits can lock \$SSR tokens in the DTF.

To kickstart the DTF, EnigmaFund has supplied \$100,000 USDC from its own fund, and has begun the process of allocating the stables into premier projects on Coinbase's Base chain.

Initial assets include:

1. Aerodrome \$AERO,

2. Definitive \$EDGE,
3. Reserve Protocol \$RSR,
4. Altcoinist \$ALTT,
5. Zora \$ZORA,
6. Toshi \$TOSHI,
7. Strategic Super Reserve \$SSR

The reserve takes a more conservative route, easing into the market, so as to take advantage of dollar-cost averaging into promising assets.

This methodology is expected to produce more stable results over time. Initially, just over 5% of the stables were allocated, and the Strategic Base Reserve anticipates a slightly more aggressive allocation from USDC into existing and new assets in the coming weeks and months.
