

# CYPFER Weighs in on AI Governance at the United Nations Global Dialogue

*CYPFER Joins Global Voices in Shaping the Future of AI with the United Nations*

MIAMI, FL, UNITED STATES, November 25, 2025 /EINPresswire.com/ -- MIAMI / TORONTO / LONDON / NETHERLANDS / DUBAI / MEXICO / CAYMAN ISLANDS –

On the eve of the United Nations General Assembly week, [CYPFER](https://www.cypfer.com), a global leader in digital forensics and cyber crisis response, has joined a transformative initiative launched at the United Nations — the Global Dialogue on Artificial Intelligence (AI) Governance.

Held in New York and organized by the UN, this high-level multi-stakeholder meeting convened world leaders, policy makers, and innovators to address the accelerating impact of AI on societies, economies, and governance. The forum provided a global platform to discuss the creation of safe, secure and trustworthy AI systems while promoting responsible innovation and inclusive access.

As a committed advocate for digital resilience, CYPFER is now actively contributing to global AI governance efforts by participating in roundtables, symposiums, and forums through the remainder of 2025 and into 2026. These events are focused on AI's implications for governance infrastructure, big data protection, and the growing cyber vulnerabilities affecting enterprise, state, and government ecosystems.

"The conversation around AI can no longer be isolated to innovation alone," said Daniel Tobok, CEO of CYPFER. "It must now include risk management, cyber readiness, and the ethical responsibility to protect the world's most vulnerable data systems. This global dialogue is a pivotal step forward."

The United Nations emphasized that every country, regardless of size or economic power, will now have a seat at the table. With the Independent International Scientific Panel on AI and the

launch of the Global Digital Compact, the aim is to ensure AI governance reflects diversity, equity, and global coordination.

CYPFER's involvement is not just symbolic; it is functional. By bringing real-time insights and field intelligence from their global cyber crisis response work, the company is helping to inform policies that will define AI governance in the years ahead.

This announcement comes at a time when heads of state, royalty, and ambassadors gather in New York to discuss the world's most pressing challenges. For CYPFER, contributing to this global dialogue is both an opportunity and an obligation — to lead with insight, to educate with purpose, and to act with urgency.

## About CYPFER

CYPFER is on a global mission to help companies create Cyber Certainty™. With an experienced team of incident responders, threat researchers, seasoned ransom experts, and data restoration experts, CYPFER is the trusted firm for leading law firms, insurance carriers and global organizations. CYPFER's cybersecurity professionals are located across the US, Canada, UK, LATAM, Caribbean, and Amsterdam. The CYPFER team is ready to respond and help clients experiencing cyber attacks 24x7x365. CYPFER's experts provide white-glove service and aim to restore Cyber Certainty™ for all clients on every engagement. CYPFER's core services include:

[Ransomware Response & Recovery](#) – Fast containment and full restoration to minimize downtime.

[Incident Response](#) – Expert, recovery-focused support for ransomware, BEC, and advanced threats.

Digital Forensics – Investigations to uncover malicious activity, insider threats, and protect data.

Post-Breach Restoration – On-site or remote recovery teams restoring systems and operations quickly.

Cyber Risk Services & Retainers – Pre- and post-breach expertise including technical testing, red teaming, tabletop exercises, and guaranteed priority access to CYPFER's recovery experts.

CYPFER is a global force in cybersecurity, operating from offices in the United States, Canada, Mexico, United Kingdom, Netherlands, the United Arab Emirates, and the Cayman Islands.

With more than 200 full-time experts protecting organizations across six continents and 12 time zones, CYPFER delivers unmatched scale and expertise. As part of its ongoing global expansion, the company is on track to grow its team to more than 300 elite cybersecurity professionals by the end of 2025.
