

StairWedge Grooved Edition Launches: Secure, Sustainable Ramp for Every Pet

The Grooved Edition of StairWedge features new trauma-reducing surface design, eco materials and global distribution plans for pet mobility leaders.

DRAPER, UT, UNITED STATES, December 16, 2025 /EINPresswire.com/ -- Today's pet owners demand more than a simple ramp—they want solutions that empower their animals, preserve their homes, and protect their investment. With the launch of the Grooved Edition, StairWedge delivers exactly that. Stairwedge is now a Multi-Patented Solution for Design and Use, with flat and groove and tread system, eco-smart construction, and premium design aimed at pets of every size.

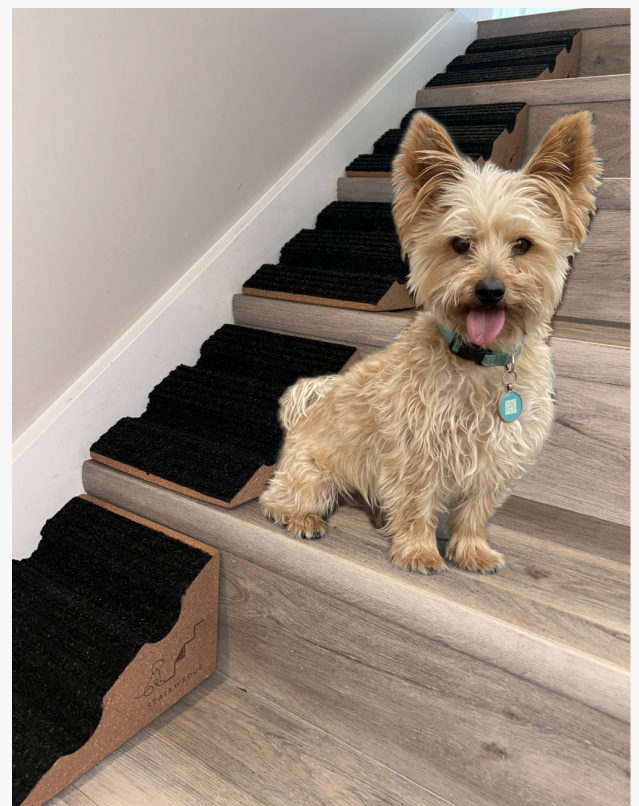

Key enhancements:

- Groove + Tread Mechanism for Paw Control — directional grooves reduce missteps; the raised tread secures footing even on slick stairs, enabling confident climbs and descents.
- Broad Weight Support + Versatile Fit — more than 1,500 lbs capacity ensures large dogs, small dogs, multi-pet households and even recovery gear work seamlessly with the ramp.
- Sustainable Materials + Home-Friendly Design — cork construction emits a natural scent that fades within days; soft-grip carpet finish integrates with décor while delivering comfort and performance.

“

What sets this version apart is simple: it listens. The groove and tread weren't just features—they were requests. We just made them real.”

Jon Webb

dog ramp for stairs

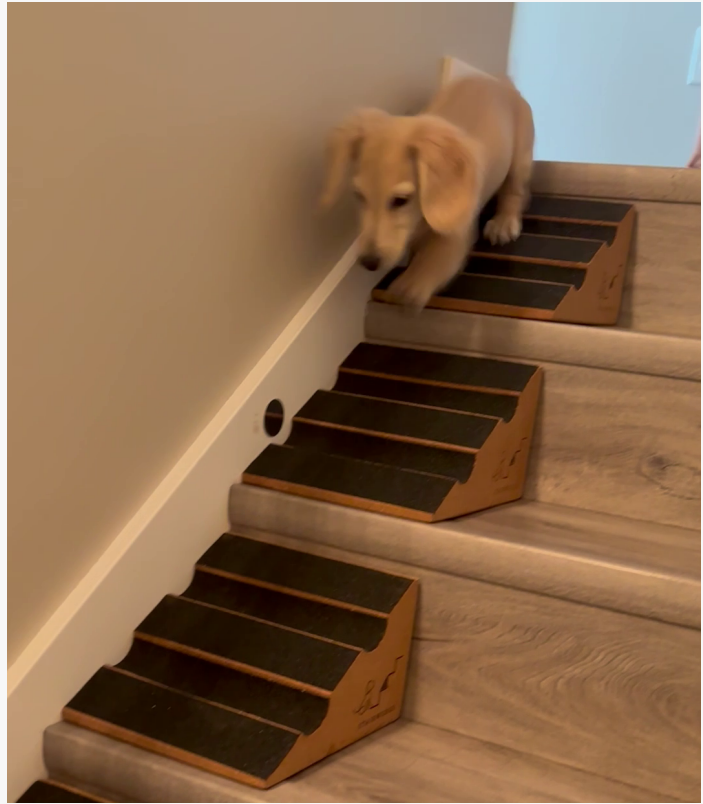

Beyond function, this edition is backed by multiple patents, reflecting StairWedge's commitment to innovation and its intention to remain the category pioneer.

Feedback from users has been overwhelmingly positive: pets that previously avoided stairs now navigate them with ease; owners see fewer lifts, less strain and more freedom.

The aesthetic build means StairWedge is not just effective—it lives well in your space.

Available today at www.stairwedge.com and major eCommerce platforms, StairWedge is also preparing an international rollout beginning Q1 2026. This ramp isn't a niche product—it's the future of pet mobility.
