

DevSecOps Solution Drives Secure Growth Amid U.S. Supply-Chain Risks

IBN Technologies' DevSecOps Solution empowers U.S. enterprises with automation, compliance, and cloud-native security integration.

MIAMI, FL, UNITED STATES, November 10, 2025 /EINPresswire.com/ -- The DevSecOps Services is gaining remarkable momentum across U.S. enterprises as digital transformation accelerates. Once limited to select technology teams, it has evolved into a vital strategy for organizations seeking to balance development velocity with uncompromised security. By embedding compliance and security practices within every phase of the software lifecycle, the [DevSecOps Solution](#) enables faster, more secure releases. The rise in cyber incidents, cloud migrations, and stringent regulatory standards has made this approach indispensable across key industries like finance, manufacturing, and healthcare.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

As attack surfaces expand and data risks intensify, companies are adopting integrated DevSecOps Solution ecosystems that unify developers, IT operations, and security teams. This unified model enhances collaboration, reduces errors, and strengthens governance. IBN Technologies plays a pivotal role in advancing this transformation through its automated DevSecOps Solution that streamlines vulnerability scanning, real-time monitoring, and compliance reporting. By aligning cybersecurity with operational goals, IBN turns the DevSecOps Solution into a foundation for digital agility, ensuring organizations grow securely and competitively in a connected world.

Strengthen compliance and agility through unified DevSecOps systems.

Rising Complexities Require Unified Defense

As digital ecosystems expand, traditional security methods are proving insufficient.

Organizations now confront a series of challenges demanding a coordinated DevSecOps Solution response:

- Inconsistent security tooling creating operational silos and visibility gaps
- Time-consuming manual compliance checks delaying software releases
- Developer concerns over restrictive security gates impacting productivity
- Lack of skilled DevSecOps professionals limiting proactive defense measures
- Integration hurdles for IaC and SAST within fast-paced CI/CD environments

IBN Tech's Unified DevSecOps Framework Driving Secure Innovation

IBN Tech's DevSecOps Solution framework is designed to integrate development, operations, and security seamlessly. It establishes a secure, automated, and compliant pipeline for modern enterprises.

□ DevSecOps Assessment & Maturity Mapping: A data-driven scan evaluates process resilience and tooling coverage, offering a phased roadmap for enhanced security posture and delivery velocity.

□ Embedded Secure CI/CD Workflows: Security automation tools (SonarQube, Fortify, Snyk) are embedded in CI/CD pipelines to conduct continuous vulnerability detection and compliance enforcement.

□ Cloud Infrastructure Hardening: Using AWS and Azure policies as code, IBN Tech ensures consistent configuration management and proactive risk prevention in cloud operations.

□ Secure Development Empowerment: Developers receive focused enablement through secure coding standards, feedback automation, and issue triage mechanisms aligned with best practices.

□ Automated Governance & Regulatory Alignment: Continuous evidence generation supports frameworks such as SOC 2, ISO 27001, GDPR, and HIPAA, eliminating redundant compliance overhead.

Client Success: Secure Development, Faster Delivery

Organizations leveraging DevSecOps Solution Services are gaining a competitive edge by merging rapid software delivery with proactive risk management.

- A top financial services provider embedded automated testing, compliance validation, and ongoing security monitoring directly into its CI/CD framework.
- The transformation reduced early-stage vulnerabilities by 40%, shortened release cycles by 30%, and established a seamless balance between innovation speed and operational security.

Future-Ready Through DevSecOps

Comprehensive security processes are becoming vital for achieving secure, compliant, and agile software delivery. According to MRFR, the global DevSecOps Solution market valued at \$6.59

billion in 2022—is projected to reach \$23.5 billion by 2032, reflecting rapid adoption and an urgent, cross-industry focus on embedding security and compliance into development pipelines. This market momentum underscores the growing recognition that DevSecOps Solution is not merely a technological trend but a strategic enabler of sustainable digital progress.

Forward-thinking organizations are expected to expand their use of automation-driven controls, continuous monitoring, and policy-as-code frameworks to strengthen resilience and governance. Industry observers identify providers like IBN Technologies as pivotal partners in this transformation, bridging the gap between secure software delivery and business agility. By aligning protection with innovation, IBN Tech's integrated DevSecOps Solution equips enterprises to scale securely in an era defined by constant change, emerging threats, and accelerating digital opportunity.

About IBN Technologies□□□□□□

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.□□□

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.□□□

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.□□
