

Abrasive Paper Market Size to Reach USD 6.6 Billion by 2032, Allied Market Research

The report provides a detailed analysis of these key players in the global abrasive paper market.

WILMINGTON, DE, UNITED STATES,
November 11, 2025 /

EINPresswire.com/ -- The global [abrasive paper market](#) is experiencing growth due to several factors such as surge in metal fabrication and metalworking industries, and expansion in automotive and aerospace sectors. However, raw material price volatility in abrasive paper hinders the market growth to some extent. Moreover, the abrasive paper market is witnessing promising opportunities propelled by ongoing

advancements in abrasive technology. These innovations represent a pivotal force that drive the market growth and offers enhanced performance, efficiency, and versatility in abrasive paper applications across various industries. In addition, the continuous evolution of abrasive materials and manufacturing processes contributes to the development of high-performance abrasive papers which meets the evolving needs of end-users.

According to the report, the global abrasive paper market was valued at \$4,404.21 million in 2022, and is projected to reach \$6,583.65 million by 2032, registering a CAGR of 4.32% from 2023 to 2032.

Segment Overview:

By type, the dry abrasive segment held the highest market share in 2022, accounting for one-third of the global abrasive paper market revenue and is estimated to maintain its leadership status throughout the forecast period. The continuous evolution and innovation in manufacturing processes increase the demand for dry abrasive paper. As industries such as

AMR Logo

automotive, woodworking, and metalworking, adopt advanced technologies and machinery, the demand for dry abrasive paper with improved abrasion properties, durability, and precision increases. In addition, the compatibility of dry abrasive paper with automated systems and high-speed machinery is crucial for enhancing overall efficiency in industrial applications.

Based on the application, wood processing segment held the highest market share in 2022, accounting for more than one-fourth of the global abrasive paper market revenue and is estimated to dominate during the forecast period. The versatility of abrasive paper makes it an indispensable tool in wood processing applications. Whether its sanding, polishing, or removing imperfections, abrasive papers are tailored to address diverse requirements across different wood types and manufacturing stages. This adaptability enhances the overall flexibility of wood processing operations that allow manufacturers to achieve a wide range of finishes and textures.

Based on the abrasive grain, aluminum oxide segment held the highest market share in 2022, accounting for less than two-fifths of the global abrasive paper market revenue and is estimated to dominate during the forecast period. Aluminum oxide has a crucial role in its prominence in abrasive paper manufacturing. It is available in various grit sizes, enabling the production of abrasive papers suitable for tasks ranging from coarse material removal to fine finishing. This versatility makes aluminum oxide abrasive paper adaptable to diverse applications within industries such as metalworking, woodworking, and automotive, meeting the specific requirements of each task.

Based on region, Asia-Pacific was the fastest growing region in terms of revenue in 2022 representing 4.63% of the CAGR. The increase in adoption of advanced technologies and automation in manufacturing processes across Asia-Pacific has led to a higher demand for precision and efficiency in surface treatment. This drives the need for abrasive papers with specific characteristics such as consistent grit size, durability, and suitability for automated machinery. In addition, the expansion in automotive industry plays a significant role in the demand for abrasive paper. As the automotive sector continues to grow and upgrade its manufacturing processes, there is a heightened requirement for abrasive papers used in tasks such as paint preparation, bodywork finishing, and polishing.

Key Players:

Key players in the abrasive paper industry include 3M, Bosch Limited, Deerfos, Hermes

Schleifmittel GmbH, Klingspor AG, Mirka Ltd, MISUMI Corporation, Saint-Gobain, sia Abrasives Industries AG, and VSM AG.

About us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.
