Circular Economy Trade Finance Global Market
Report 2025

How Much Is The [Circular Economy Trade Finance Market](#) Worth?

The market size for trade finance in the circular economy has been expanding swiftly in the past few years. It is anticipated to surge from \$12.00 billion in 2024 to \$14.02 billion in 2025, reflecting a compound annual growth rate (CAGR) of 16.8%. The significant increase during the historic period can be credited to growing worldwide commitments towards sustainability and climate objectives, increased adoption of circular corporate business structures, escalating demand for resource-efficient supply chains, the rise in environmentally-friendly projects, and the expanding issuance of green bonds and loans tied to sustainability.

Company*

In the forthcoming years, the market size of circular economy trade finance is predicted to experience a swift expansion. The forecast predicts that it will balloon to \$25.76 billion in 2029, enjoying a compound annual growth rate (CAGR) of 16.4%. The growth in the forecasted period could be ascribed to the heightened consciousness about environmental impact among enterprises and consumers, escalating trade activities, growing support from government policies, digital transformation surge, and regulatory frameworks aiming at sustainability. Key trends for the forecast period encompass integration of digital technologies, cross-border

collaborations, innovative financial products, business model innovations, and development in technology for climate risk assessment tools.

What Are The Factors Driving The Circular Economy Trade Finance Market?

The anticipated growth in global trade is set to boost progress in the circular economy trade finance market. The act of trade, which involves the buying, selling, or swapping of goods and services between people or organisations, is on the rise due to globalization. Globalization has broadened market reach, allowing businesses worldwide to better connect with customers and suppliers. Circular economy trade finance brings advantages to trading activities by offering funding constructs that back up the reuse and recycling of resources, thereby lowering costs and improving sustainability across supply chains. As an illustration, in March 2025, the Switzerland-based intergovernmental organization, United Nations Conference on Trade and Development, reported that global trade achieved a record peak of \$33 trillion in 2024, signifying a 3.7% growth equivalent to an increase of \$1.2 trillion. Consequently, the growth of global trade is a driving factor for the expansion of the circular economy trade finance market.

Who Are The Major Players In The Circular Economy Trade Finance Market?

Major players in the Circular Economy Trade Finance Global Market Report 2025 include:

- Bank of America Corporation
- Citigroup Inc.
- JPMorgan Chase & Co.
- Wells Fargo & Company
- BNP Paribas S.A.
- MUFG Bank Ltd.
- HSBC Holdings Plc
- Deutsche Bank AG
- ING Groep N.V.
- The Goldman Sachs Group Inc.

What Are The Upcoming Trends Of Circular Economy Trade Finance Market In The Globe?

Top firms in the circular economy trade finance market are concentrating on devising sophisticated strategies including sustainable finance taxonomies with the aim to guide investments towards initiatives that produce quantifiable environmental and social benefits. These taxonomies work as schemes segregating economic activities based on their contribution towards environmental, social, and governance sustainability objectives. As an example, in May 2025, the US-based International Finance Corporation (IFC) brought forth the Harmonized Circular Economy Finance Guidelines. These guidelines assist investors, finance institutions, and private companies to identify and assess opportunities to channel funds towards circular economy programs. They lay down concrete criteria for eligible activities and transactions, fostering worldwide harmonization and market consistency. With a foundation on frameworks

such as biodiversity, blue finance, and green bond taxonomies, these guidelines widen the range of qualified assets and boost private investment for sustainable growth. Uniquely, these guidelines are the inaugural ones to describe and quantify eligible transaction volumes in line with the EU Categorization System and ICMA Green Bond Principles.
