

# TADA Cognitive Solutions Launches Self-Service Applications to Accelerate Supply Chain Performance

---

*Freemium, secure microapps deliver measurable impact in hours, not months, including up to a 25% decrease in purchase costs through Tariff! Manager*

PEORIA, IL, UNITED STATES, November 13, 2025 /EINPresswire.com/ -- TADA Cognitive Solutions today announced the launch of the TADA Microapps Suite, a portfolio of secure, self-serve, AI-powered applications engineered to orchestrate transformation across industrial manufacturing, automotive, healthcare, and CPG supply chains.

Tariff! Manager is estimated to deliver up to a 25% decrease in purchase costs, 2–4x faster margin recovery, and up to 40% productivity gains. The TADA Microapps Suite delivers measurable value in hours, without complex, lengthy, or costly integrations.

“Our customers face unprecedented volatility across their supply chains,” said Harsh Koppula, Co-Founder and President of TADA Cognitive Solutions. “TADA’s Microapps put the power of our patented Digital Duplicate® technology, a next-generation AI-enabled digital twin, directly in the hands of decision-makers, helping them act fast with clarity and confidence.”

## Why TADA Microapps

- Fast Setup: Sign up, connect, and see value the same day. No sales call required. No complex integration. IT-friendly.
- Start Free & Upgrade: Use core features at no cost, upgrade in-app, or scale to TADA’s Enterprise Apps as needs evolve.
- Secure & Private: Built using TADA Shield to keep your data private and under your control.
- Built for Real Jobs: Pre-built flows and views for high-impact use cases so teams can prove ROI fast.

## Explore the TADA Microapps Portfolio

- Tariff! Manager: Surface tariff exposure at the SKU and part level and model true landed costs.
- Spend! Manager: Unlock spend visibility with part- and supplier-level 360s. Profile spend, assess

risk, and model scenarios.

- RM Inventory! Manager: Gain multi-echelon visibility into raw materials, demand, and on-hand positions.
- Clean TO! Build: See live build readiness by monitoring component availability and schedule health.
- Short! Sheet: Detect shortages across complex BOMs and identify potential resolutions.
- Order! Board Manager: Track live order status, flag exceptions early, and prioritize next best actions with unified order tracking.
