

Mass Spectrometry Market on Growth Trajectory, Estimated to Reach \$14.6 Billion by 2032

By technology, the Hybrid Mass Spectrometry is one of the dominating segment in the market and accounted for the revenue share of over 49.2% in 2022.

WILMINGTON, DE, UNITED STATES, November 13, 2025 /EINPresswire.com/ -- The [Mass Spectrometry Market](#) is experiencing substantial growth due to its vital role in analytical chemistry and various applications across diverse industries. This advanced analytical technique enables precise measurement of molecular components, making it indispensable in pharmaceuticals, environmental testing, and clinical diagnostics. Continuous technological advancements are driving innovation and expanding the market's reach. With increasing demand for accurate analytical tools, the Mass Spectrometry Market is poised for continuous expansion and adoption, making it a key player in scientific research and industrial processes. The global mass spectrometry market was valued at \$6.9 billion in 2022, and is projected to reach \$14.6 billion by 2032, growing at a CAGR of 7.7% from 2023 to 2032.

The mass spectrometry industry holds the maximum potential, owing to the technological advancement in MS techniques for more than a century and growth in concerns for food and environmental welfare are responsible to drive the market growth. The surging awareness in terms of regulatory authorities targeting environmental welfare is expected to lead to an increase in the use of toxicity tests to check the safety of products, which are anticipated to supplement market growth during the forecast period.

Major market players covered in the report, such as -

Shimadzu Corporation,
Leco Corporation,
Thermo Fisher Scientific Inc.,
Kore Technologies, Ltd.,
Agilent Technologies, Inc.,
Bruker Corporation,

Waters Corporation,
Hiden Analytical Ltd.,
Danaher Corporation,
PerkinElmer, Inc.

Key Benefits for Stakeholders -

- The report provides quantitative analysis of market segments, current trends, strategies and potential of Mass Spectrometry Market research to identify potential Mass Spectrometry Market opportunities in genetics.
- In-depth analysis of this sector helps identify current market opportunities.
- Market analysis and information related to key drivers, restraints and opportunities are provided. • Porter's Five Forces Analysis identifies the capabilities of buyers and suppliers to enable stakeholders to make profitable business decisions and strengthen the network of buyers.
- The largest countries in each region are listed according to their contribution to the global market.
- Focusing on market players makes benchmarking easier and provides a clear understanding of the current market situation.
- The report includes regional and global Mass Spectrometry Market analysis, key players, market segments, application areas and Market growth strategies.

Based on technology, the hybrid spectrometry segment has the largest share in 2020, accounting for more than half of the market. Moreover, this segment is expected to register the highest CAGR of 8.7% from 2021 to 2030. The research also examines aspects such as mass spectrometry and others.

Based on application, the pharmaceutical sector took the lion's share in 2020, contributing almost a quarter of the market. However, the security sector is expected to show the highest CAGR of 9.9% during the forecast period.

The Mass Spectrometry Market is expected to witness a significant growth in the coming years. This market has gained interest of the healthcare and medical sectors owing to increased prevalence of hypertension throughout the globe. Furthermore, the global Mass Spectrometry Market is segmented on the basis of product type, end user, and region. Leading market players have been introducing various strategies to help enterprises move their on-premise models to on-demand models.

About Us -

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various research

data tables and confirms utmost accuracy in our market forecasting. Each and every us companies and this helps us in digging out market data that helps us generate accurate y data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
