

Ecer.com Revolutionizes Global B2B Trade with AI-Powered Full-Link Solutions

BEIJING, CHINA, CHINA, November 14, 2025 /EINPresswire.com/ -- Leading Mobile B2B marketplace [Ecer.com](https://www.ecer.com) Drives the Intelligent Transformation of Cross-Border Commerce with Seamless, Integrated AI Services.

Traditional trade models are undergoing a profound intelligent transformation, driven by AI technology. Ecer.com (www.ecer.com), a leading global mobile foreign trade B2B marketplace, is at the forefront of this change, announcing the full implementation of its AI strategy to build a smarter, more efficient B2B trade marketplace and forge new cooperative bridges between global buyers and sellers.

The comprehensive AI strategy addresses key friction points across the trade lifecycle, fundamentally reshaping how global sourcing is conducted.

Intelligent Matching Ensures Precision Business Opportunities

On conventional B2B marketplaces, both buyers and sellers often spend extensive time sifting through irrelevant information. Ecer.com's intelligent matching system tackles this inefficiency by analyzing purchaser behavior preferences, search habits, and other data to construct precise user profiles. The system moves beyond simple product keywords, incorporating regional market characteristics and procurement cycles to ensure highly accurate business opportunity matching.

Barrier-Free Language, Zero-Distance Communication

Language barriers are a frequent stumbling block in cross-border cooperation. Ecer.com resolves this issue with its intelligent customer service system, which supports real-time interpretation across more than 20 languages and facilitates 24/7 uninterrupted communication. The system is designed not only to accurately translate daily conversation but also to recognize complex, industry-specific terminology, making international communication simple and highly efficient.

VR Cloud Factory Audits: A New Standard for Trust

The high costs and lengthy lead times associated with physical factory inspections have long been a major headache in global trade. Ecer.com's innovative VR Cloud Factory Audit system allows buyers to remotely inspect the entire factory facility in an immersive experience. This feature significantly reduces time and cost while boosting confidence in the partnership, making

it a standout feature of the marketplace.

"The era of generic B2B marketplaces is over. Our goal at Ecer.com is to eliminate friction points in cross-border trade, from the initial contact to final verification," said Alice Wang, Chief Technology Officer at Ecer.com. "By leveraging AI for precision matching, multilingual support, and full-link integration, we are not just digitizing trade; we are making it intrinsically smarter and more reliable."

Full-Link Service Creates a New Trade Ecosystem

Industry experts believe that the deep integration of AI, big data, and other technologies will usher B2B trade into a new intelligent era. Empowered by AI technology, Ecer.com organically integrates every stage of the trade process. Buyers can now complete the entire workflow—from sourcing and communication to factory inspection and transaction—all on a single, unified marketplace without the need to switch between disparate systems. This seamless, intelligent service drastically improves overall trade efficiency, creating a robust new trade ecosystem.

About Ecer.com

Ecer.com is a leading global mobile B2B trade marketplace committed to facilitating seamless and efficient cross-border commerce. By pioneering AI-driven technologies, Ecer.com provides comprehensive, integrated solutions that connect international buyers and sellers, fostering trust and streamlining the entire trade lifecycle.
