Challenges Addressed by Microsoft Purview

As businesses continue to expand their digital footprints across cloud, hybrid, and on-premises

environments, the need for robust and unified data security practices has never been more critical. With increasing regulatory demands and evolving cybersecurity threats, companies face significant challenges in ensuring data integrity, compliance, and protection against both internal and external risks.

1. Visibility gaps across cloud, hybrid, and on-premises data landscapes
2. Growing regulatory and compliance requirements (GDPR, HIPAA, ISO 27001)
3. Risks of sensitive data exposure in meetings, communications, and AI-generated content
4. Inefficient manual data quality checks and retention policy enforcement
5. Lack of real-time threat detection and response for insider risks and external threats
6. Siloed security tools limiting unified governance and actionable insight

Addressing these vulnerabilities requires an integrated approach to security that enhances visibility, automates data protection policies, and ensures real-time monitoring and compliance management. Only through comprehensive and synchronized data security frameworks can organizations safeguard their critical assets and maintain operational resilience.

#### IBN Technologies Delivers Microsoft Purview-Enabled Security

IBN Technologies deploys Microsoft Purview as the backbone of its Microsoft managed security services, offering unique differentiators:

1. End-to-end governance through the Purview Unified Catalog for comprehensive data mapping, lineage, and quality assessments
2. Automated sensitivity label assignment for documents, Teams meetings, and cloud resources, ensuring ongoing protection of confidential information
3. Seamless DLP monitoring—including Security Copilot for AI-driven content—to prevent leaks and capture risky activities across enterprise environments
4. Insider risk management bolstered by real-time alerting and content exploration, with Microsoft MSSP guidance on incident containment
5. Efficient data lifecycle management, automated retention/deletion of obsolete records, and audit-ready reporting for compliance
6. Advanced eDiscovery tools for legal and regulatory response, with metadata analytics and

## case management options

As a microsoft mssp, IBN Technologies combines best-of-breed cyber service, expert certifications, and process automation to achieve continuous, adaptive protection.

## Microsoft Purview Through IBN Technologies

Unified, real-time visibility into distributed data enables rapid, informed decision-making, ensuring that security teams can quickly assess and respond to risks. Automated enforcement of data security policies and retention rules significantly reduces the compliance burden, while proactive monitoring and audit preparation streamline the process. The integration of smart AI minimizes false positives, allowing for a more targeted and efficient risk response. This results in accelerated remediation and consistent governance across platforms, strengthening protection against insider threats and emerging AI-related risk vectors.

## Future-Proof Security and Compliance

A fundamental leap in data security, governance, and compliance for businesses negotiating the intricacies of cloud settings is represented by Microsoft Purview. Microsoft Purview provides a unified solution that simplifies governance across multi-cloud and on-premises systems as businesses look to manage, safeguard, and optimize their data.

Leading this change is IBN Technologies, which provides companies with strategic MSSP knowledge and trustworthy Microsoft-managed security services. By integrating adaptive cyber services, IBN Technologies helps clients exploit the full potential of Microsoft Purview, ensuring data is secure, compliant, and aligned with industry best practices. IBN Technologies helps businesses to confidently navigate the changing regulatory environment while maintaining a robust, future-ready security posture through ongoing monitoring, customized security solutions, and seamless service integration.
