

# The Packaging Company Showcases CR Glass Jar Design for Controlled Storage

*The Packaging Company, a leading provider of sustainable and compliant packaging solutions, has announced its latest showcase focusing on CR glass jar design.*

LONG BEACH, CA, UNITED STATES,  
November 18, 2025 /

[EINPresswire.com/](https://www.einpresswire.com/) -- [The Packaging Company](https://www.thepkgco.com/), a leading provider of sustainable and compliant packaging solutions, has announced its latest showcase focusing on [CR glass jar](#) design. The initiative aims to emphasise how controlled storage solutions are evolving to meet the changing safety and compliance demands of the regulated markets, including pharmaceuticals, cosmetics, and cannabis packaging.

## Redefining Standards in Controlled Storage

The new showcase highlights the precision and durability of the CR glass jar, designed to ensure both product integrity and consumer protection. Built with compliance at its core, the packaging system follows stringent safety protocols to prevent unintended access while maintaining aesthetic value for shelf appeal. These jars are intended for brands seeking reliable

containment for sensitive or restricted-use products, balancing safety with functionality.

In recent years, the global market has seen a growing need for packaging that aligns with legal frameworks and environmental expectations. The Packaging Company has directed its R&D efforts toward addressing these twin challenges, focusing on recyclable materials and user-friendly, compliant closures.

### Design and Market Adaptation

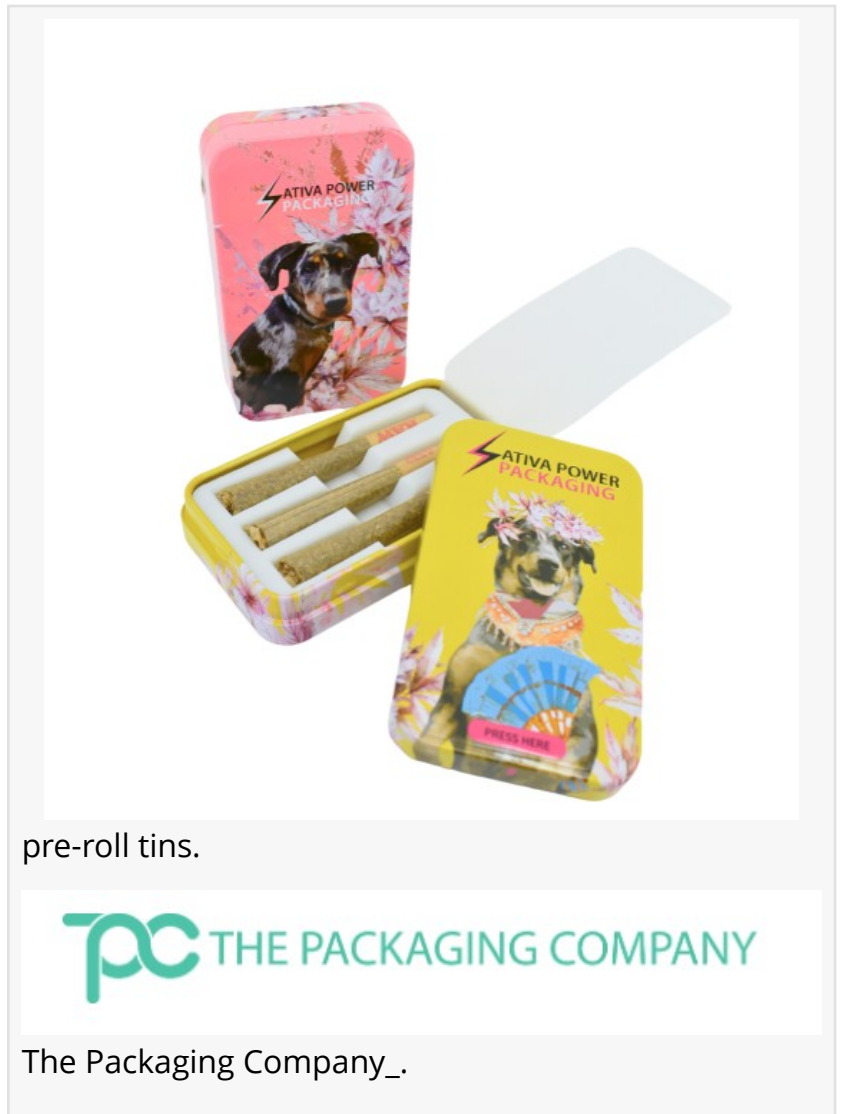

The design of the CR glass jar prioritises child resistance without compromising usability. Each jar features a locking mechanism compliant with recognised safety standards while allowing adult consumers ease of use. Additionally, the material composition maintains product freshness, extending shelf life and supporting consistent quality control.

Alongside this development, the company continues to innovate in secure packaging for various applications, including pre-roll tins, airless containers, and squeeze tubes. These formats share a unified goal, enhancing safety while responding to market-specific requirements. The Packaging Company's approach reflects its broader vision of making compliance practical, accessible, and sustainable.

According to, Product Development Manager at The Packaging Company, "Safety-driven design has become a necessity rather than an option. The focus is on functionality and compliance, ensuring packaging aligns with both brand and consumer expectations."

### Integration of Safety and Sustainability

In its ongoing research and product refinement, The Packaging Company integrates child-resistant technology with eco-conscious materials. The showcased CR glass jar line utilises recyclable glass and minimal plastic components, reducing the environmental impact of single-

pre-roll tins.

use packaging.

The same philosophy extends to pre-roll tins, where the company has introduced compact metal packaging designed for reusability and child resistance. These solutions support brands in regulated industries seeking to merge responsible manufacturing with compliance assurance.

“Packaging today is about creating a balance, one where safety standards and sustainability coexist,” stated a Packaging Analyst at The Packaging Company. “Our work focuses on achieving that balance without sacrificing performance or usability.”

## Industry Alignment and Future Outlook

The Packaging Company continues to align its product portfolio with evolving regulatory frameworks such as ASTM and ISO standards for child-resistant packaging. With global brands increasingly emphasising traceability and sustainability, the company anticipates broader adoption of hybrid materials like glass-metal composites and airless dispensing systems.

The firm’s showcase serves as an informational platform for industry stakeholders to evaluate advancements in packaging technologies that protect product integrity while addressing environmental goals. By developing solutions like CR glass jars and [pre roll tins](#), The Packaging Company aims to support safe, compliant, and efficient product storage for both emerging and established markets.

## About The Packaging Company

The Packaging Company is a packaging solutions provider specialising in compliant, sustainable, and customizable packaging systems for cosmetics, pharmaceuticals, and cannabis-related products. The company’s portfolio includes child-resistant packaging, airless pump systems, jars, and tubes tailored to global safety and quality requirements. Its operations emphasise material innovation, regulatory adherence, and sustainable design practices.
