Rise in demand for special steel products from the end-use industries drives the growth of the India special steel market. On the other hand, lack of technological advancement, high cost of raw materials, capital cost, and logistics challenges hinder the growth to some extent. However, several government initiatives & investment toward infrastructure development are expected to create lucrative opportunities in the industry.

The India special steel market is analyzed across product type, product, and application. Based on product type, the ball bearing steel segment contributed to more than one-fifth of the total market share in 2020, and is anticipated to lead the trail by the end of 2035. The high speed steel segment, on the other hand, would register the fastest CAGR of 11.1% during the forecast period.
