

AlxMed and ASCT Partnership

*Advancing Digital Pathology Education
with AI-Powered Tools*

SANTA CLARA, CA, UNITED STATES,
November 17, 2025 /

EINPresswire.com/ -- AlxMed, a
recognized innovator in AI diagnostics
for urine cytology, and the American

Society for Cytology (ASCT), announce a strategic partnership. This collaboration aims to enhance ASCT's educational offering in digital cytology by integrating AlxMed's specialized [AlxURO](#) technology into their curriculum, preparing the next generation of Cytologists for both traditional and digital microscopy.

“

We are pleased to partner
with AlxMed and add their
expertise in urine cytology
to our growing portfolio of
educational tools.”

*Shea Murphy MS, CT(ASCP) of
ASCT*

AlxURO Technology Integration

AlxMed's AlxURO solution is specifically developed to assist in the analysis of non-invasive urine cytology specimens. Its primary goal is to improve both diagnostic accuracy and workflow efficiency in the assessment of bladder cancer. The AlxURO software is capable of accurately identifying suspicious and atypical cells from urine samples, utilizing The Paris System (TPS) for Reporting Urinary Cytology. These capabilities are designed to support clinical decision-

making, potentially reducing the need for invasive procedures such as cystoscopies, increasing patient compliance, and promoting more cost-effective healthcare delivery.

Statements from Leadership

Shea Murphy MS, CT(ASCP) of ASCT, expressed enthusiasm about the partnership, stating, “We are pleased to partner with AlxMed and add their expertise in urine cytology to our growing portfolio of educational tools. This partnership reflects our ongoing commitment to integrating valuable AI capabilities that meet the specific needs in training our future Cytologists.”

Samuel Chen, CEO of AlxMed, also commented on the collaboration: “We recognize ASCT as the premier organization for training the next generation of Cytologists. Our goal, through collaboration with ASCT, is to help students understand digital cytology and utilize AI generated diagnostic algorithms to improve their diagnostic capabilities. We are excited to provide an integrated and tested solution within their teaching workflow to allow ASCT to continue to

achieve perform their mission.”

For further information or to request a demonstration of these solutions, interested parties are encouraged to visit www.ASCT.com or www.aixmed.com.

About AlxMed

Founded in 2018, AlxMed is dedicated to transforming cancer diagnosis and monitoring through its computational cytology platform. The company digitizes 3D cytology samples rapidly and extracts clinical insights to improve patient care. Its flagship application, AlxURO, aids in bladder cancer diagnosis using The Paris System for Reporting Urinary Cytology (TPS). Currently, AlxURO is available as a Research Use Only (RUO) application. More information can be found at AlxMed.com.

About ASCT

The American Society for Cytology (ASCT) is a collective voice for the profession and is committed to defining and promoting the profession of cytology. The organization, develops practice standards; Monitors and evaluates legislative/regulatory issues and emerging technologies affecting the profession; and provides unique, practical educational opportunities pertinent to the practice of cytology.
