EINPresswire.com/ -- [Karin Herzog](#), the original Swiss oxygen skincare brand founded by Dr Paul Herzog (Nobel Institute awardee), has officially launched its [Black Friday Sale](#), offering 25% off sitewide with code BF25, along with free shipping Australia-wide and a free deluxe gift with every order for a limited time.

Karin Herzog has seen a significant rise in demand across Australia over the past year, with local customers reporting noticeably brighter, smoother and more radiant skin in as little as two weeks. The brand is globally recognised for its patented stabilised active oxygen technology, a scientific breakthrough developed in the Herzog family's Swiss laboratory.

Unlike traditional moisturisers that rely on oils, acids or botanicals, Karin Herzog formulas release a controlled dose of oxygen directly onto the skin. This unique delivery method helps increase circulation, support natural collagen, brighten dull complexions, reduce congestion and improve hydration — all without irritation. Oxygen has long been used in clinics and professional facials, but Karin Herzog is the first skincare brand to successfully stabilise active oxygen in a cream, allowing customers to achieve professional-style results from home.
