EINPresswire.com/ -- Prime 1 Studio announces the start of pre-orders for its new 1/4 scale statue of Akuma from "Street Fighter 6", released as part of the Premium Masterline series.

This statue is based on Akuma's key visual and presents the character in a standing pose with clenched fists. His hair, physique, and costume elements—such as the mantle and waist wrap—are sculpted with detailed surface textures. The piece includes LED lighting for the eyes and the "Ten" kanji on his back, which can be activated as part of the display.

The base is designed after ENMA's HOLLOW, Akuma's stage in the game. It features elements such as candles, side panels with neon-style accents, and shutter graffiti motifs.

The Ultimate Version includes an additional upper body part inspired by the "Sip of Calamity" sequence, with both open-hand and clenched-fist options. A separate effect stand and a
