

DevSecOps Managed Services Fuel U.S. Growth as Industries Advance Secure Automation

Discover how DevSecOps Managed Services strengthen U.S. enterprises with secure automation, and continuous risk monitoring across industries.

MIAMI, FL, UNITED STATES, November 18, 2025 /EINPresswire.com/ -- The U.S.

DevSecOps managed sector is witnessing significant growth, propelled by rising cyber risks, intensified regulatory requirements, and the fast-moving adoption of cloud-native platforms. Enterprises across finance, healthcare, manufacturing, and government are leveraging [DevSecOps Managed Services](#) to embed security directly within their software development processes, enabling accelerated yet secure releases. With internal DevSecOps expertise scarce and establishing secure development pipelines costly,

providers like IBN Technologies offer cost-effective, scalable solutions for continuous monitoring, automated compliance, and proactive risk management. For many organizations, outsourcing DevSecOps Managed Services has become indispensable a core strategy to protect critical data, uphold stakeholder confidence, and remain competitive.

Experts note that this paradigm shift is redefining how U.S. industries approach cybersecurity. Security is now integrated from the very beginning of development cycles rather than treated as a later addition. IBN Technologies helps firms adopt this proactive framework, reducing risks while ensuring strict compliance with federal and state mandates, from HIPAA in healthcare to PCI-DSS in finance. As cyberattacks increase in sophistication, businesses increasingly depend on DevSecOps Managed Services for continuous surveillance, automated vulnerability detection,

IBN Technologies: Expert in Outsourced Finance and Accounting Services

and rapid incident response capabilities that internal teams cannot always match.

Growing Industry Risks Demanding Proactive and Immediate Response

Current software development environments are encountering severe security barriers that outdated tactics cannot manage:

- Fragmented security technologies producing operational blind spots and inefficient silos
 - Compliance work performed manually, delaying releases and amplifying audit vulnerabilities
 - Developers pushing back against security guardrails considered to impede delivery speed
 - A widening shortage of DevSecOps expertise, leaving teams overstretched and underprepared
-
- Challenges intensifying around embedding Infrastructure as Code scanning and Static Application Security Testing across existing CI/CD workflows

Strategic DevSecOps Services Enabled by IBN Tech

IBN Tech delivers a holistic set of DevSecOps capabilities that embed security throughout delivery cycles, addressing prevalent technical, cultural, and compliance challenges:

- DevSecOps Maturity Assessment & Roadmap Planning: A comprehensive capability scan identifies pipeline, tooling, and team gaps, followed by a roadmap that outlines tactical and strategic remediation.
- CI/CD Security Integration: Tools such as SAST, DAST, and SCA (Snyk, Fortify, SonarQube) are incorporated directly into CI/CD flows to automate testing and enforce security controls.
- Cloud DevOps Security Hardening: AWS and Azure pipelines are safeguarded using policy-as-code processes that prevent misconfigurations and ensure controlled cloud operations.
- Development Team Enablement & Secure Coding: Developers receive structured guidance, coding protocols, and vulnerability triage support to accelerate remediation and uplift security posture.
- Compliance Automation & Governance Reporting: Evidence collection is automated for key standards—SOC 2, ISO 27001, HIPAA, GDPR—reducing repetitive tasks and simplifying audits.

Client Success: Accelerated Delivery with Robust Security

With the adoption of DevSecOps Managed Services, organizations gain the ability to deploy software faster while embedding strong security throughout the entire development process.

- A major financial services provider enhanced its pipeline by implementing automated security reviews, continuous monitoring tools, and compliance validation across its CI/CD ecosystem.
- This upgrade helped the company reduce early-stage critical vulnerabilities by 40%, cut overall release durations by 30%, and give development teams the assurance to innovate freely without diminishing security posture.

Advancing DevSecOps for Resilient Growth

Experts highlight that as businesses accelerate digital innovation, comprehensive, automated

security practices have become indispensable for delivering secure and compliant software at enterprise scale. This shift is echoed in industry forecasts: according to MRFR, the DevSecOps market—worth \$6.59 billion in 2022 is set to expand to \$23.5 billion by 2032, underscoring the fast-growing reliance on embedded security and real-time compliance automation. Managed service partners are expected to lead in transforming outdated, fragmented security processes into integrated, intelligence-driven models. Supporting this evolution, IBN Technologies provides scalable security architectures, standardized governance controls, and continuous compliance frameworks tailored for multifaceted development environments.

Going forward, the trajectory of DevSecOps in the U.S. will be influenced by stricter regulations, more advanced threat profiles, and widespread adoption of AI-assisted monitoring and development workflows. Organizations implementing continuous risk analytics, automated compliance evidence, and policy-as-code will gain a decisive edge in resilience and deployment efficiency. To bridge skill gaps and sustain modernization, many enterprises will continue relying on proven DevSecOps Managed Services partners. In this expanding market, IBN Technologies stands prepared to help companies elevate security maturity, optimize delivery pipelines, and build a future-ready approach to secure innovation.

About IBN Technologies□□□□□□□□

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR,□vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business□continuity□and disaster recovery, and□DevSecOps□implementation—enabling seamless digital transformation and operational resilience.□□□

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management.□These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.□□□

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.□□□
