

# Ecer.com Leads a New Wave of Digitalization in China's Foreign Trade B2B Industry

BEIJING, CHINA, CHINA, November 18, 2025 /EINPresswire.com/ -- In the accelerating digital evolution of global trade, technology has become a crucial factor in reshaping foreign trade competitiveness. [Ecer.com](http://www.ecer.com) ([www.ecer.com](http://www.ecer.com)), a mobile foreign trade B2B platform deeply integrated with AI technology, is committed to transforming technological power into productivity. By building an intelligent foreign trade ecosystem, it helps Chinese manufacturing achieve a critical leap from "going global" to "intelligent navigation."

Supported by strong technological capabilities, ecer.com has established a globally covering digital trade platform. The platform has gathered over 2.6 million registered suppliers, achieving significant advantages in scale and traffic, and providing a fast track for Chinese export enterprises to the international market. By integrating marketing promotion, supply chain collaboration, cross-border logistics, and other end-to-end services, the platform digitizes and standardizes the complex processes in traditional foreign trade, significantly improving trade efficiency and lowering the barriers for businesses to go global.

In the mobile internet era, ecer.com has deeply optimized its mobile experience, breaking down time and space limitations to achieve real-time and convenient trade communication. Overseas buyers can initiate inquiries and compare prices anytime via mobile devices; Chinese suppliers can respond to business opportunities in real time, showcasing their company strength and product features through the mobile end. The platform's innovative "VR Factory Tour" feature further allows international buyers to "visit" the production line, greatly enhancing purchasing trust and laying a solid foundation for cooperation.

Driven by AI technology, the platform has built an intelligent trade service system:

**Precise Matching System:** Deeply analyzes the characteristics of both supply and demand through algorithmic models to achieve accurate business opportunity recommendations.

**Data Insight Engine:** Provides market trend forecasts and customer profile analysis for enterprises based on massive transaction data.

**Intelligent Customer Service System:** Supports multilingual 24/7 online response, significantly improving inquiry conversion efficiency.

**Predictive Analysis Tools:** Help enterprises anticipate market changes and optimize product portfolios and marketing strategies.

Ecer.com is evolving from a traditional B2B platform to an intelligent foreign trade ecosystem,

building a new trinity model of "platform + data + service." By digitizing and visualizing the entire trade process, the platform helps enterprises move from simple information display to deep value co-creation, forming a sustainable new global trade ecosystem.

In an era where technological innovation and global trade are deeply integrated, ecer.com, with digitalization as its foundation and intelligentization as its engine, has not only carved out new pathways for Chinese manufacturing to reach the world, but also continuously empowers it to demonstrate new value on the global stage through technological innovation. In the future, with the continuous improvement of its platform ecosystem, ecer.com will keep leading China's foreign trade B2B into a smarter and more efficient new phase.

#### About Ecer.com

Ecer.com is a leading B2B foreign trade platform dedicated to empowering Chinese enterprises in their global expansion. By integrating cutting-edge AI, big data, and mobile technologies, Ecer.com provides a one-stop digital solution for cross-border trade, enhancing operational efficiency and fostering international business collaboration.
