

Dollar Energy Fund Reaches Milestone of Providing Utility Assistance Grants to One Million Households Across the USA

More than 26,000 Nebraska Residents Helped with more than \$9.5 Million

PITTSBURGH, PA, UNITED STATES, November 18, 2025 /EINPresswire.com/ -- Dollar Energy Fund, a nonprofit organization whose mission is focused on helping limited-income households maintain basic gas, electric, water and wastewater utility service, today announced a significant milestone of one million households within 18 states receiving utility assistance grants through its hardship programs since the organization was founded in 1983.

In Nebraska, Dollar Energy Fund has provided 26,441 grants totaling \$9,614,400 in utility assistance since 2020 to help households maintain critical utility services during times of crisis. The program is coordinated through its utility partners Metropolitan Utilities District, Omaha Public Power District, and Nebraska Public Power District.

This achievement represents Dollar Energy Fund's efforts throughout four decades of partnership with utility companies, community-based organizations and donors—all committed to providing our neighbors in need with utility assistance and other services that support self-sufficiency.

"For the last 42 years, we've remained committed to fulfilling the mission of helping our neighbors in need by providing utility assistance and giving hope to the some of the most vulnerable members in the communities we serve," said Chad Quinn, Dollar Energy Fund's CEO. "Each grant represents an individual or family who saw an improvement in their situation. They didn't have to choose between providing necessary food and prescriptions or paying their electric bill, were able to keep the water running in their homes, or didn't have to face a winter in the cold. We're proud of what we've accomplished and look forward to continuing our work to help the next million households in need."

Dollar Energy Fund's assistance programs operate in 18 states, serving customers of 54 utility partners, and are administered through a partnership with more than more than 550 community-based organizations. The Hardship Program provides grants that are directly applied to the utility accounts of households facing a financial difficulty, with many recipients experiencing a temporary crisis such as a job loss, injury or unexpected emergency expense.

Since 1983, Dollar Energy Fund's Hardship Program has benefited more than 1,021,448 households—and counting—by providing \$344 million in assistance grants. During the 2024-2025 program year, more than 81,500 households across the organization's multi-state service territory received a combined \$24.2 million in assistance.

Of those who received a grant, half have children under the age of 18 in the household, approximately 20 percent have senior citizens ages 62 and older, and one in 10 households were without utility service and required a grant to restore their service.

Hardship Program guidelines and program details vary by partnering utility companies and are subject to change throughout the program year. The most up-to-date information can be found at www.dollarenergy.org/need-help.

Those seeking assistance should first contact their utility provider to be screened for eligibility and to receive a referral to one of Dollar Energy Fund's community-based organization partners to complete their application. This process not only provides local, in-person options when applying for utility assistance, but also connects families with a network of agencies that offer additional resources, such as financial counseling, transportation aid, childcare assistance, and housing resources. Additionally, customers of select utility companies may be able to use Dollar Energy Fund's MyApp portal to complete all or a portion of their application online.

Dollar Energy Fund relies on public contributions, with most utility partners providing dollar-for-dollar matching funds to maximize the impact of each dollar donated. Contributions can be made online at www.dollarenergy.org/donate or by sending a check to Box 42329, Pittsburgh, PA 15203. Customers can also opt in to donate directly through their monthly utility bills, and all donations are tax-deductible. Every effort is made to ensure donations from a specific state are used to benefit households in that same area.

For more information about Dollar Energy Fund, how to apply for utility assistance, or to make a donation, please visit www.dollarenergy.org.
